

### THURSDAY, JUNE 17, 2016 – 5 AM WEATHER FORECAST

Showers last night dropped approximately .63" of rain from 9 PM to 1 AM giving us a storm fall total of 2.97". Thankfully, mostly cloudy skies this morning will become partly sunny after 8 AM and then we'll see some mostly sunny skies again at times this afternoon. Temps should get into the low 80s by mid-afternoon with a northeast wind mainly 6-12 mph, but could gust higher at times – especially west of the turnpike. High pressure builds in Saturday giving us mainly sunny skies with highs in the middle 80s and less wind out of the east and northeast. And Sunday's weather remains pleasant with highs potentially reaching the upper 80s with a more south to southwest flow. More clouds enter the picture on Monday ahead of the next cold front to move into our area on Tuesday.
