

MONDAY, AUGUST 8, 2016 – 5 PM WEATHER FORECAST

Look for mainly sunny skies through sunset with temps in the 80s and dewpoints in the lower 60s. Our occasional east and northeast breeze this afternoon will become more southerly Tuesday morning as dewpoints rise through the 60s toward 70. Highs on Tuesday should top out in the upper 80s with heat indices in the middle 90s. That heat and humidity should be enough out ahead of a weak upper trough to kick up showers and storms across Ohio Tuesday afternoon. While a shower or sprinkle is possible Tuesday morning, really look for the action to get going to our south and southwest from 11 AM to 2 PM and spread north and northeastward as the afternoon progresses. The axis in which has the best chance for showers and storms on Tuesday afternoon (60%) stretches from Cincinnati towards Cleveland, going right through Columbus. Most, but maybe not all, of that activity should wind down after midnight Tuesday night with more hit or miss showers and storms forecast to redevelop Wednesday afternoon and evening. Once again, the forecast looks to remain very similar on Thursday and Friday with only subtle differences each day.
