

### WEDNESDAY, JULY 6, 2016 – 5 AM WEATHER FORECAST

Temperatures are starting off in the 50s again this morning and should top out around 76 this afternoon much like yesterday. The early morning marine layer cloud cover will burn off similar to yesterday as well with peaks of sunshine 7 – 9 AM and then lots of radiant sunshine from 10 AM on. Southeast winds to begin this morning will dance between the southeast and southwest through the middle of the day with gusts climbing up to around or just past 15 mph. Since persistence is a good forecast around here this time of year, the weather for Thursday looks nearly identical to yesterday and today. However as a trough of low pressure aloft in the atmosphere moves through northern California this weekend, so we will see some subtle and not so subtle changes. Friday and Saturday's wind looks as though it will become more northwesterly midday with possibly a northwest wind all day Sunday once we are behind the exiting trough. It is also starting to look as though highs may remain in the 70s each day with Sunday having the best chance of reaching 80.
