

THURSDAY, JULY 7, 2016 – 5 AM WEATHER FORECAST

Morning clouds will pull back toward the coast as the morning progresses with plenty of sublime sunshine in store for this afternoon. After starting out in the 50s, temps will top out in the middle 70s once again this afternoon with dewpoints staying in the 50s. Light winds early this morning will pick gradually out of the south and east heading towards lunchtime. And depending where you are on the course this afternoon the wind will dance back and forth from the southeast to the southwest at times with gusts getting up to around 15 mph or so – even down to the clubhouse when it temporarily blows out of the southwest. The marine layer low cloud cover will push back in overnight tonight with Friday morning's clouds possibly lingering as late as 11 AM before becoming sunny Friday afternoon. Winds will also turn to come more out of the northwest Friday afternoon increasing with a gust around 20 mph very possible across the higher elevations – while at the same time the clubhouse may not get past 10 mph. Highs on Friday may actually make an attempt to climb into the upper 70s before dropping down again a few degrees on Saturday when we see could be the strongest northwest winds.
