Rules of Handicapping

Effective January 2024

In collaborating to issue the Rules of Golf and Rules of Amateur Status, the USGA and The R&A operate in separate working jurisdictions. The USGA is responsible for administering the Rules of Golf and Rules of Amateur Status in the United States, its territories and Mexico, and The R&A, operating with the consent of its affiliated golfing bodies, has the same responsibilities for all other parts of the world.

In collaborating to issue the Rules of Handicapping, as well as the other parts of the World Handicap System, the USGA and The R&A operate jointly throughout the world.

## FOREWORD

### PRINCIPAL CHANGES

### DEFINITIONS

## I. FUNDAMENTALS OF HANDICAPPING (RULE 1)

### Rule 1 - Purpose and Authorization; Obtaining a Handicap Index

1.1 Purpose of the World Handicap System

1.2 Authorization to Use the World Handicap System

1.3 Responsibilities of Player, Handicap Committee and Authorized Association

1.4 How to Obtain a Handicap Index
   - 1.4a Joining a Golf Club
   - 1.4b Designating a Home Club

## II. SCORES FOR HANDICAP PURPOSES (RULES 2 - 4)

### Rule 2 - Scores Acceptable for Handicap Purposes

2.1 Acceptability of Scores
   - 2.1a Played in an Authorized Format of Play
   - 2.1b Played by The Rules of Golf

2.2 Minimum Number of Holes Played for Score to be Acceptable
   - 2.2a For an 18-hole Score
   - 2.2b For a 9-hole Score

### Rule 3 - Adjustment of Hole Scores

3.1 Maximum Hole Score for Handicap Purposes
   - 3.1a Before a Handicap Index Has Been Established
   - 3.1b After a Handicap Index Has Been Established

3.2 When a Hole is Not Played
   - 3.2a Reason for Not Playing One or More Holes
   - 3.2b Score to Record When One or More Holes Not Played

3.3 When a Hole is Started But Player Does Not Hole Out

---

*Note: The page numbers are placeholders and should be replaced with actual page numbers.*
### Rule 4 - Submitting a Score

4.1 Information Required for Scoring Record
   4.1a General
   4.1b For Scores Prior to Establishing a Handicap Index
4.2 Eligibility to Submit a Score
4.3 Time Frame for Submitting a Score
4.4 Certification of a Score
4.5 Number of Scores Required for Initial Handicap Index

### III. HANDICAP CALCULATION AND UPDATING A HANDICAP INDEX (RULES 5 - 6)

#### Rule 5 - Handicap Index Calculation

5.1 Calculation of a Score Differential
   5.1a For an 18-hole Score
   5.1b For a 9-hole Score
   5.1c Rounding of Minus Score Differentials
5.2 Calculation of a Handicap Index
   5.2a For Fewer Than 20 Scores
   5.2b For 20 Scores
   5.2c For Plus Handicap Index
5.3 Maximum Handicap Index
5.4 Frequency of Revision of a Handicap Index Update
5.5 Ageing of Scores and Lapsing of a Handicap Index
5.6 Playing Conditions Calculation
5.7 Low Handicap Index
5.8 Limit on Upward Movement of a Handicap Index
5.9 Submission of an Exceptional Score

#### Rule 6 - Course Handicap and Playing Handicap Calculation

6.1 Course Handicap Calculation
   6.1a For an 18-hole Round
   6.1b For a 9-hole Round
6.2 Playing Handicap Calculation
   6.2a Standard Calculation
   6.2b Calculation When Multiple Tees with Different Pars Are Used in a Competition
IV. ADMINISTRATION OF A HANDICAP INDEX (RULE 7)  73

Rule 7 - Committee Actions  74

7.1 Handicap Committee  74
   7.1a Conducting a Handicap Review and Adjusting a Handicap Index  74
   7.1b Posting a Missing Score or Penalty Score  78
   7.1c Withdrawing a Handicap Index  81
   7.1d Reinstating a Handicap Index  81

7.2 Committee in Charge of a Competition  81
   7.2a Terms of the Competition  81
   7.2b Other Actions  82

V. APPENDICES  84

Appendix A: Rights & Responsibilities  84
Appendix B: Player’s Scoring Record  90
Appendix C: Handicap Allowances  96
Appendix D: Handicap Review  103
Appendix E: Stroke Index Allocation  106
Appendix F: Establishing Par  108
Appendix G: The Golf Course, Course Rating and Slope Rating  110

VI. LOCAL GUIDANCE FOR GOLF CLUB COMMITTEES  117

INDEX  119
Foreword to the 2024 Edition of the Rules of Handicapping

Welcome to the first revision to the Rules of Handicapping™; an update to the single set of Rules that was first introduced in 2020 to enhance the enjoyment of golfers worldwide.

The Rules of Handicapping are part of the World Handicap System™ (WHS™), which also includes the Course Rating System™, and they are jointly governed by the USGA and The R&A on a unified basis throughout the world. The administration and oversight of handicapping in each country is the responsibility of National Associations or other authorized bodies, which ensures the system operates effectively and responsively at the local level.

Recent years have seen a significant increase in participation in the game of golf and, with that, an increase in the number of scores submitted for handicap purposes. Since its launch in January 2020, the WHS has been adopted by over 125 countries and is being actively used by millions of golfers. We are delighted at the part the WHS is playing to promote and support the growth of the sport.

This first revision to the Rules of Handicapping continues to build on the original three objectives, which have each guided the development of WHS since its inception and formed a strong foundation: (i) to encourage as many golfers as possible to obtain and maintain a handicap; (ii) to enable golfers of differing abilities, genders and nationalities to take their handicap to any course in the world and compete on a fair basis, and (iii) to indicate with sufficient accuracy the score a golfer is reasonably capable of achieving on any course around the world, playing under normal conditions.

In particular, the revisions aim to enhance the inclusivity, accessibility and integrity of the system and examples include (i) a lower minimum length requirement for a Course Rating™ to be issued, a change that will accommodate many shorter and par 3 courses, and (ii) more robust and meaningful safeguards, including increased guidance on the Handicap Review procedure and eligibility criteria for elite level events.

A summary of the principal changes can be found on Page 10. Most of these changes will be implemented by the handicap software used by National Associations and golf clubs and, therefore, do not require any change in behaviour by golfers. However, one change that players may be asked to undertake more frequently is the submission of hole-by-hole scores to facilitate the new method of handling ‘holes not played’ under Rule 3.2.

Thanks must go to the Handicap Operations Committee and its sub–Committees for the invaluable insights that they continue to provide, and which have ultimately helped to produce this new edition of the Rules of Handicapping.

Sharon Ritchey (USGA)  
Chair  
World Handicap Authority

Birgitta Ljung (The R&A)  
Chair  
Handicap Operations Committee
ONE STANDARD

A tradition of excellence comes not just from celebrating a game’s great past, but in leading it into the future. Alongside the USGA and The R&A, Rolex is proud to be part of the vision of a truly timeless sport.

#Perpetual
Principal Changes Introduced in the 2024 Rules of Handicapping

**Rule 3.2a When a Hole is Not Played**

Rule 3.2 has been restructured as follows:

Rule 3.2a provides more clarity on what might constitute a valid or invalid reason for not playing one or more holes.

Rule 3.2b sets out a new method for calculating an 18-hole Score Differential when one or more holes have not been played for a valid reason. This new method replaces the net par procedure with an expected score (see new Definition).

Two new Clarifications set out:

- A summary of the procedure for calculating a Score Differential using an expected score, and
- Allowing for the use of net par in limited circumstances.

**Rule 5.1b Calculation of a Score Differential – For a 9-hole Score**

The previous method of combining two 9-hole scores has been replaced with use of an expected score where the 9-hole Score Differential is combined with the expected score of a player with a given Handicap Index to produce an 18-hole Score Differential.

**Rule 5.2c For Plus Handicap Index**

This Rule has been updated to include the Clarification issued in July 2022 providing guidance on the designation of a plus (+) Handicap Index.

**Rule 6.2a Playing Handicap Calculation – Standard Calculation**

This Rule has been updated to include the Clarification issued in September 2021 giving some discretion on when rounding occurs.
Rule 7.1b Posting a Missing Score or Penalty Score

This Rule has been restructured for clarity and to provide more guidance on what penalty score to apply, in different circumstances.

Rule 7.2a Committee in Charge of the Competition - Terms of the Competition

Rule 7.2a has been updated to incorporate the Clarification issued in January 2023, providing additional guidance for Committees in charge of elite level competitions regarding entry/eligibility requirements.

Appendix C Handicap Allowances

Appendix C has been amended to clarify that the recommended allowances are based on a ‘normal’ field size and make-up, and that a Committee can consider adjusting the allowances for other field sizes or different field make-ups.

A recommended allowance for a 3-player scramble format has been added to the table.

The application of allowances in team match play events has also been changed so that the % is applied to the difference, rather than to the individual.

Appendix D Handicap Review

Appendix D has been updated to incorporate additional guidance, which will enhance the tools available to Handicap Committees to assist them with the handicap review process.

Appendix F Establishing Par

Rule 6.2a has been amended to recommend the standardization of par across tee sets, where appropriate.

Appendix G The Golf Course, Course Rating and Slope Rating

Appendix G has been updated to include the new minimum length of a golf course to be eligible for a Course Rating and Slope Rating. This will allow scores to be acceptable for handicap purposes over a golf course of 1500 yards [1370 metres] for 18 holes and 750 yards [685 metres] for 9 holes.
Definitions

Acceptable Score
A score from an authorized format of play which meets all the provisions set out within the Rules of Handicapping (see Rule 2).

Active Season
The period of time when acceptable scores from a specified area should be submitted for handicap purposes, as determined by the Authorized Association where the round is played.

Adjusted Gross Score
A player’s gross score, including any penalty strokes, adjusted for when:

- The player exceeds their maximum hole score,
- A hole is not played, or
- A hole is started but the player does not hole out.

(See Rule 3.)

Authorized Association
An entity that is authorized, in accordance with the structure set out by the United States Golf Association (USGA) and R&A Rules Limited (The R&A), to implement and administer the Rules of Handicapping within its jurisdiction and to carry out the responsibilities as delegated to it by the authority through which it is authorized. Such an entity must be a Multi-National, National or Regional Association, Federation or Union unless otherwise approved by the USGA and The R&A where no such entity exists.

Authorized Format of Play
A format of play eligible for handicap purposes, as determined by the Authorized Association where the round is played (see Rule 2.1a).

Bogey Player
A player with a Handicap Index of approximately 20.0 for men and approximately 24.0 for women.
**Cap**
The procedure that reduces or limits the amount by which a player’s *Handicap Index* can increase when measured against the player’s *Low Handicap Index*. There are two trigger points within the *cap* procedure:

- *Soft cap* – the point after which there is a reduction in the rate of upward movement of a *Handicap Index*.
- *Hard cap* – the point which sets the maximum limit for the upward movement of a *Handicap Index*.

(See Rule 5.8.)

**Certification of Score**
The verification of a player’s score. This can be evidenced in two ways:

- By a marker’s physical signature or electronic certification, and/or
- Through *peer review*.

(See Rule 4.4.)

**Course Handicap**
The number of handicap strokes a player receives, before *handicap allowances*, from a specific set of tees as determined by the *Slope Rating* and the difference between *Course Rating* and *par* (see Rule 6.1).

**Course Rating**
An indication of the difficulty of a *golf course* for the *scratch player* under normal course and weather conditions (see Appendix G).

**Exceptional Score**
A *Score Differential* which is at least 7.0 strokes better than the player’s *Handicap Index* at the time the round was played (see Rule 5.9).

**Expected Score**
The score a player is expected to achieve over a specified number of holes on a course of standard difficulty. It is calculated using the player’s *Handicap Index* and attributes a numerical value against any hole or holes not played during a round.
**Definitions**

**General Play**
When an organized competition is not being contested and golfers are playing:
- A casual round; or
- Competitively, but not in an event organized by a Committee.

**Golf Club**
An organization that is permitted, through affiliation to its Authorized Association, to administer and manage the Handicap Index of those players who have designated it as their home club, in accordance with the requirements of the Rules of Handicapping. To qualify for affiliation, a golf club may be required to satisfy certain requirements as determined by its Authorized Association.

**Golf Course**
An area of land where golf is played, made up of the following five areas as defined in the Rules of Golf:
1. The general area,
2. The teeing area a player must play from in starting the hole being played,
3. All penalty areas,
4. All bunkers, and
5. The putting green of the hole being played.

Each hole may have multiple teeing areas and, for handicap purposes, a golf course is made up of a designated set of tees on each hole. As such, each set of tees (or golf course) should have a separate Course Rating and Slope Rating, including one for each gender where appropriate.

**Handicap Allowance**
The percentage of a Course Handicap recommended to create equity for all players participating in a specific format of play (see Appendix C).

**Handicap Committee**
The entity established by a golf club or an Authorized Association which is responsible for ensuring compliance with the obligations of the golf club or Authorized Association under the Rules of Handicapping (see Rule 1.3 and Appendix A).
**Handicap Index**

The measure of a player’s demonstrated ability calculated against the *Slope Rating* of a *golf course* of standard playing difficulty (that is, a course with a *Slope Rating* of 113) (see Rule 5.2).

**Handicap Review**

A procedure carried out by the *Handicap Committee* to determine if the *Handicap Index* of any *member* who has designated that *golf club* as their *home club* needs to be adjusted (see Rule 7.1a and Appendix D).

**Hard Cap (see Cap)**

**Home Club**

A player’s primary *golf club* designated by the player to ensure their *Handicap Index* is managed in accordance with the *Rules of Handicapping*.

**Inactive Season**

The period of time when scores in a specified area cannot be submitted for handicap purposes, as determined by the *Authorized Association* where the round is played.

**Jurisdiction**

The geographic territory in which an *Authorized Association* administers the *Rules of Handicapping*.

**Low Handicap Index**

The lowest *Handicap Index* calculated for the player during the 365-day period (one year) preceding the day on which the most recent score on their *scoring record* was played (see Rule 5.7).

**Member**

An individual who joins a *golf club* in a manner determined by club policy, which allows the player to obtain a *Handicap Index*.

**Most Likely Score**

The score a player records for handicap purposes for a hole that is started but where the player does not hole out (see Rule 3.3).
**Definitions**

**Net Double Bogey**
A score equal to the *par* of a hole plus two strokes and adjusted for any handicap strokes applied on that hole. A *net double bogey* is a player’s maximum hole score for handicap purposes (see Rule 3.1).

**Net Par**
A score equal to the *par* of a hole adjusted for any handicap strokes applied on that hole (see Rule 3.2).

**Par**
The score that a *scratch player* would generally be expected to achieve on a hole under normal course and weather conditions, allowing for two strokes on the putting green (see Appendix F). The *Authorized Association*, or at the discretion of the National Association the *golf club*, is responsible for adjudicating *par* (see Appendix A).

**Peer Review**
The process by which a score or *Handicap Index* can be confirmed or challenged (see Rule 4.4).

**Penalty Score**
A score posted at the discretion of the *Handicap Committee* for a player who:

- Fails to submit an *acceptable score*, and/or
- Does not complete their round, or does not play one or more holes, for an invalid reason (see Rule 7.1b(iii)).

**Playing Conditions Calculation (PCC)**
The statistical calculation that determines if conditions on a day of play differed from normal playing conditions to the extent that they significantly impacted players’ performance. Examples of conditions that could impact players’ performance include:

- Course conditions,
- Weather conditions, and
- Course set-up.

(See Rule 5.6.)
**Playing Handicap**
The *Course Handicap* adjusted for any *handicap allowances* or Terms of the Competition. It represents the actual number of strokes the player gives or receives for the round being played (see Rule 6.2).

**Rules of Golf**
The *Rules of Golf* as approved by the United States Golf Association (“USGA”) and R&A Rules Limited (“The R&A”), including any Local Rules the Committee adopts for the competition or the *golf course*.

**Rules of Handicapping**
The *Rules of Handicapping* as approved by the United States Golf Association (“USGA”) and R&A Rules Limited (“The R&A”) and administered by the *Authorized Association* within its *jurisdiction*.

**Score Differential**
The difference between a player’s *adjusted gross score* and the *Course Rating*, reflecting the *Slope Rating* and the *playing conditions calculation*. It is the numerical value attributed to a score achieved on a *golf course* on a specific day that is posted into the player’s *scoring record*. A *Score Differential* must be an 18-hole value or its calculated equivalent.

(See Rule 5.1).

**Scoring Record**
A history of a player’s *acceptable scores* along with:
- The player’s current *Handicap Index*,
- The player’s *Low Handicap Index*,
- Other details about each round (such as, the date the round was played), and
- Any applicable adjustments (for example, an *exceptional score*).

(See Appendix B.)

**Score Type**
A designation that identifies the type of *acceptable score* that appears within a player’s *scoring record* (see Appendix B).

**Scratch Player**
A player with a *Handicap Index* of 0.0.
Slope Rating
An indication of the relative difficulty of a golf course for players who are not scratch players compared to players who are scratch players (see Appendix G).

Soft Cap (see Cap)

Stroke Index
The value assigned to each hole on a golf course to indicate where handicap strokes are given or received (see Appendix E).
Fundamentals of Handicapping

RULE 1
1.1 Purpose of the World Handicap System

The World Handicap System includes the *Rules of Handicapping* and the Course Rating System. Its purpose is to enhance the enjoyment of the game of golf and to give as many golfers as possible the opportunity to:

- Obtain and maintain a *Handicap Index*,
- Use their *Handicap Index* on any *golf course* around the world, and
- Compete, or play a casual round, with anyone else on a fair and equitable basis.

This is achieved by:

- Establishing *Course Ratings* and *Slope Ratings* for each set of tees, based on length and playing difficulty (see Diagram 1.1).
- Applying adjustments to a *Handicap Index* to reflect the *golf course* being played and the format of play.
- Assessing the impact of playing conditions, using players' scores on a specific day and applying adjustments when necessary.
- Limiting the maximum hole score for handicap purposes to ensure a *Handicap Index* continues to reflect a player’s demonstrated ability.
- Applying a uniform calculation for updating a *Handicap Index* for all acceptable scores submitted.
- Updating a *Handicap Index* on a daily basis, or soon thereafter.
- Reviewing a player’s *Handicap Index* on a regular basis to ensure it continues to reflect the player’s demonstrated ability.
In order to use the World Handicap System, an Association must be authorized by the USGA and The R&A. Within its area of jurisdiction, an Authorized Association may:

- Use the Rules of Handicapping and the Course Rating System.
- Use the registered marks of the World Handicap System.
Rule 1

- Issue a Handicap Index either directly or, where delegated, through a golf club.
- Issue a Course Rating and a Slope Rating.

The following trademarks and service marks are owned or licensed by the USGA and The R&A; all rights reserved:

World Handicap System™, WHS™, Handicap Index®, Score Differential™, Low Handicap Index™, Course Handicap™, Playing Handicap™, Course Rating System™, Course Rating™, Bogey Rating™ and Slope Rating™.

Any organization that is not authorized to use the World Handicap System is prohibited from using these marks or any part of the World Handicap System. This includes the Course Rating System and the handicap calculation formula, except when the organization provides handicapping products or services to a golf club through an Authorized Association.

1.3 Responsibilities of Player, Handicap Committee and Authorized Association

Players, Handicap Committees and Authorized Associations all play an important role in ensuring the Rules of Handicapping are being implemented and administered appropriately.

The main areas of responsibility for each key stakeholder are:

(i) Player

A player is expected to:

- Act with integrity by following the Rules of Handicapping and to refrain from using, or circumventing, the Rules of Handicapping for the purpose of gaining an unfair advantage,
- Attempt to make the best score possible at each hole,
- Submit all acceptable scores to provide reasonable evidence of their demonstrated ability,
- Submit acceptable scores for handicap purposes as soon as possible after the round is completed and before midnight local time,
- Play by the Rules of Golf, and
- Certify the scores of other players.
(ii) **Golf Club/Handicap Committee**

- A *golf club* is affiliated to its *Authorized Association* and is responsible for ensuring the *Handicap Index* of those *members* who have designated it to be their *home club* is administered in accordance with the requirements of the *Rules of Handicapping*.

- A *Handicap Committee* is established by a *golf club* and is responsible for ensuring compliance with the *golf club*’s specified obligations and responsibilities under the *Rules of Handicapping*.

- Where a National Association administers and manages a player’s *Handicap Index* directly, the National Association assumes the responsibilities of a *golf club*.

(iii) **Regional Golf Association**

- A Regional Golf Association is affiliated to its National Association and comprised of *golf clubs* and/or golfers within a defined area.

- A Regional Golf Association has specific responsibilities within the World Handicap System and may be delegated additional obligations by its National Association.

(iv) **National Association**

- An authorized National Association has the exclusive rights to implement and administer the World Handicap System within its *jurisdiction*, including the issuance of a *Handicap Index*.

- A National Association has specific responsibilities within the World Handicap System and may be delegated additional obligations by a Multi-National Association.

- An authorized National Association may delegate some of its responsibilities to a Regional Golf Association or a *golf club*. 
(v) **Multi-National Association**

- Where a Multi-National Association is the Authorized Handicapping Body, the Multi-National Association has the exclusive rights to implement and administer the World Handicap System within its *jurisdiction* on behalf of all member National Associations.

- An authorized Multi-National Association may delegate certain rights or responsibilities to a National Association within its *jurisdiction* to implement and fulfil the obligations of the World Handicap System on behalf of the Multi-National Association.

(vi) **The USGA and The R&A**

- Together, the USGA and The R&A are responsible for writing and interpreting the *Rules of Handicapping* and the Course Rating System.

- The USGA and The R&A are the joint governing authorities of the World Handicap System and are responsible for authorizing the use of the World Handicap System.

The full rights and responsibilities of each key stakeholder are outlined in Appendix A.

### 1.4 How to Obtain a Handicap Index

#### 1.4a Joining a Golf Club

In order to obtain a *Handicap Index* that can be administered in accordance with the *Rules of Handicapping*, a player must be:

- A *member* of a *golf club* that is affiliated with an *Authorized Association*, or

- A direct *member* of an *Authorized Association* which has assumed the responsibility of a *golf club* (see Rule 1.3(ii)).

By returning a score for the purpose of obtaining or maintaining a *Handicap Index*, the player acknowledges that the use of their *scoring record* will be available for:

- *Peer review* purposes (See Rule 4.4),

- Issuance of a *Handicap Index*, and

- Administration and research purposes.
### Rule 1.4a Clarifications:

**1.4a/1 – Whether a Professional Golfer Can Obtain a Handicap Index**

A professional golfer may obtain a *Handicap Index*, provided they meet all of the player responsibilities within the *Rules of Handicapping*.

---

### 1.4b Designating a Home Club

A player must designate one *golf club* as their *home club*, to be responsible for maintaining their *Handicap Index*.

When a player is a *member* of more than one *golf club*, the player must ensure each *golf club* knows the details of:

- All other *golf clubs* of which they are a *member*, and
- Which *golf club* they have designated as their *home club*.

All *golf clubs* of which a player is a *member* should share information with the player’s *home club* and/or the *Authorized Association* and may:

- Request that the *home club* or *Authorized Association* makes an adjustment to the player’s *Handicap Index*, or
- Make their own adjustment to the player's *Handicap Index*.

Any actions must comply with the *Authorized Association’s* local procedures.

---

### Rule 1.4b Clarifications:

**1.4b/1 – Criteria to be Used When Designating a Home Club**

Rule 1.4b requires a player to designate one *golf club* as their *home club*.

Where a player is a *member* of more than one *golf club*, the decision as to which *golf club* to designate as their *home club* should be based on one or more of the following criteria:

- Proximity of *golf club* to primary residence (which is in the same country),
- Frequency of play at a *golf club*, and/or
- The *golf club* where they submit most of their *acceptable scores*.

A *golf club* must not permit players who do not satisfy one or more of the above criteria to designate it as their *home club*.
Should a player’s primary residence change on a regular basis such that different golf clubs satisfy the above criteria at different times of the year, the player should consider changing their home club accordingly.

Players must not designate a home club for the purpose of obtaining a Handicap Index that could give them an unfair advantage.

1.4b/2 – Player Changes Designation of Home Club

When a player changes the designation of their home club for any reason, they must inform all golf clubs of which they are a member and provide the new home club with their scoring record.

1.4b/3 – Player Who Belongs to Multiple Golf Clubs Within Different Jurisdictions Resulting in More Than One Handicap Index

Appendix A, 1 states that “a player is expected to ... (ii) Have only one Handicap Index from a single scoring record, which is managed by the player’s home club in accordance with the Rules of Handicapping.” It goes on to state that “This Handicap Index will apply elsewhere, including at all other golf clubs of which the player is a member.”

Where a player is a member of a golf club located in a different jurisdiction from the location of their home club, the player may be required to hold a separate Handicap Index issued by the Authorized Association responsible for handicapping within the different jurisdiction. In order to ensure the same Handicap Index is issued by both Authorized Associations, it is the player’s responsibility to return all acceptable scores to both their home club and the golf club that is located in the different jurisdiction.

Should there ever be a discrepancy between a player’s Handicap Index as issued by different Authorized Associations, the Handicap Index within the jurisdiction where the round is being played should be updated to include missing scores from all authorized formats of play and/or any Committee-applied adjustments as appropriate. When playing outside of either jurisdiction, the lowest Handicap Index should be used or the Handicap Index that includes the most recent 20 scores.
Scores for Handicap Purposes

RULES 2-4
Scores Acceptable for Handicap Purposes

**Principle of the Rule:**

The scores a player submits for handicap purposes are at the core of the calculation of their Handicap Index.

Rule 2 covers the conditions a score must satisfy for it to be acceptable for handicap purposes, providing confidence that it will produce reasonable evidence of the player’s ability and, ultimately, a Handicap Index that is reflective of demonstrated ability.

**2.1 Acceptability of Scores**

A score is acceptable for handicap purposes if the round has been played:

- In an *authorized format of play* (see Rule 2.1a) over at least the minimum number of holes required for either a 9-hole or an 18-hole score to be acceptable (see Rule 2.2),

- In the company of at least one other person, who may also act as a marker (subject to satisfying any other requirements of the *Rules of Golf*),

- By the *Rules of Golf* (see Rule 2.1b),

- On a *golf course* with a current *Course Rating* and *Slope Rating*, where length and normal playing difficulty is maintained at a consistent level (see Appendix G),

- On a *golf course* during its *active season*.

In addition, the player’s score must always be certified in accordance with the *Rules of Handicapping* (see Rule 4.4).

If one or more of the requirements set out above is not met, the score is not acceptable for handicap purposes.
**Rule 2.1 Clarifications:**

2.1/1 – Score is Acceptable for Handicap Purposes Even If Holes Have Not Been Played in the Order Set by the Committee

Rule 5.1 of the *Rules of Golf* requires holes in a round to be played in the order set by either the Committee in charge of the competition or the Committee in charge of the golf course. However, provided the player has not been disqualified, a score is acceptable for handicap purposes even if the holes in a round have not been played in the order set by the Committee.

For example:

- When the golf course is busy and starting at an alternative hole will allow a quicker pace of play.
- When playing holes in a different order will allow more players to complete their rounds, particularly during periods when daylight is limited.

If the player has been disqualified, see Rule 2.1b.

2.1/2 – Status of Scores Made When Match Play and Stroke Play Formats are Played Concurrently

When a player competes in a match while also playing in a stroke-play round and both are authorized formats of play, the stroke-play score is the score that should be submitted for handicap purposes. The match-play score should not be submitted.

2.1/3 – Returning Scores for Handicap Purposes While Playing on Temporary Greens or Tees

The Authorized Association should determine whether scores made under temporary course conditions are acceptable for handicap purposes. The Authorized Association should also determine whether a temporary modification to the Course Rating and Slope Rating is required to reflect the temporary changes (see Appendix G).
2.1a Played in an Authorized Format of Play

*Authorized formats of play are:*

<table>
<thead>
<tr>

(i) **Round Played Within a Player’s Jurisdiction.** Subject to other provisions set out within the *Rules of Handicapping*, an acceptable score from an *authorized format of play* within a player’s home *jurisdiction* must be submitted for handicap purposes (see Diagram 2.1a).

(ii) **Round Played Outside a Player’s Jurisdiction.** Subject to other provisions set out within the *Rules of Handicapping*: 
- A score from an *authorized format of play* within the *jurisdiction* where the round was played is acceptable for handicap purposes and must be submitted, even if the format of play is not authorized in a player’s home *jurisdiction*.

- A score from a format of play that is unauthorized within the *jurisdiction* where the round was played, but is an *authorized format of play* within the player’s home *jurisdiction*, is acceptable for handicap purposes and must be submitted.

- A score from a format of play that is unauthorized within both the *jurisdiction* where the round was played and within the player’s home *jurisdiction* is not acceptable for handicap purposes and must not be posted to the player’s *scoring record*.

(See Diagram 2.1a.)

 ✓ Submit score ✗ Not acceptable

**Rule 2.1a Clarifications:**

**2.1a/1 – Scores Not Acceptable for Handicap Purposes**

Some formats of play and scores played under certain restricted Terms of the Competition are not acceptable for handicap purposes.

The following illustrative list is not exhaustive and if a player is in doubt as to the acceptability of a score, it is recommended that they check with the *golf club* where they are playing or the *Authorized Association*.
Rule 2

- While being coached on the course
- When using non-conforming equipment
- When the number or type of golf clubs to be used is restricted
- When score cannot be verified by another person
- Not playing the required number of holes
- When a player does not play their own ball. For example, scrambles
2.1a/2 – Scores From Competitions Not Organized By An Affiliated Golf Club

Rule 1.3(i) states that a player is expected to “submit all acceptable scores to provide reasonable evidence of their demonstrated ability”. Subject to other provisions set out within the Rules of Handicapping, an acceptable score from an authorized format of play must be submitted for handicap purposes, even if it was from a competition organized by an entity that is not affiliated to the Authorized Association, for example a Society or League.

When such scores are not submitted automatically by the entity organizing the competition, the player is required to submit the score using the procedures set out by the Authorized Association.

Where a player fails to submit an acceptable score or fails to comply with the procedures set out by the Authorized Association, the Handicap Committee should act in accordance with Rule 7.1b.

2.1b Played by the Rules of Golf

A round must be played by the Rules of Golf to be acceptable for handicap purposes, subject to the following:

(i) **Organized Competitions.** In a situation where a player is disqualified from a competition for a breach of the Rules of Golf, but no significant scoring advantage has been gained, the score should remain acceptable for handicap purposes.

   If a player is disqualified from a competition for any other breach of the Rules of Golf, the score is not acceptable for handicap purposes.

   The final determination is at the discretion of the Committee, based on the circumstances.

(ii) **General Play.** When an organized competition is not being contested, a score is not generally acceptable for handicap purposes if the player:

   - Breaches the Rules of Golf, and the correct penalty is not applied under the Rules of Golf, or
   - Deliberately ignores a Rule of Golf.

   Where a player follows the provisions set down in a Model Local Rule, even when the Committee in charge of the course has not adopted that Model Local Rule, the score may still be acceptable for handicap purposes. The same situation applies where a player is in breach of a Model Local Rule that has been adopted by the Committee.
Rule 2

Examples of situations relating to Model Local Rules where a score might be acceptable for handicap purposes include:

- A player has proceeded under the alternative option to the stroke and distance relief procedure, despite this Model Local Rule not being in effect, or
- The player has used a distance–measuring device despite the Model Local Rule prohibiting their use being in effect.

The final determination is at the discretion of the Committee, based on the circumstances.

Rule 2.1b Clarifications:

2.1b/1 – Examples of When Player Has Been Disqualified From a Competition, But Gained No Significant Scoring Advantage

The Committee has the discretion to accept a score for handicap purposes if a player is disqualified from a competition, but no significant scoring advantage has been gained.

Examples of situations where a Committee may consider that no significant scoring advantage has been gained include:

<table>
<thead>
<tr>
<th>Rule of Golf</th>

</tbody>
</table>

#### 2.1b/3 – Hole Not Played by The Rules of Golf in General Play

Where a player has breached the *Rules of Golf in general play* and knowingly failed to apply the correct penalty, the score should not generally be accepted for handicap purposes. However, depending on the circumstances, the Committee has the discretion to produce an acceptable score by:

- Recording the actual score for the hole, or
- Adjusting the hole score using *net double bogey*, or
- Applying a score of *net par*.

#### 2.2 Minimum Number of Holes Played for Score to be Acceptable

**2.2a For an 18-hole Score**

For an 18-hole score to be acceptable for handicap purposes, a minimum of 10 holes must be played.

**2.2b For a 9-hole Score**

For a 9-hole score to be acceptable for handicap purposes, all 9 holes must be played. If a player has not played at least 9 holes, the score is not acceptable for handicap purposes.

Note:

An acceptable 9-hole score must be played over 9-holes with a current *Course Rating* and *Slope Rating* (see Rule 2.1).
Adjustment of Hole Scores

**Principle of the Rule:**
A score for handicap purposes should not be overly influenced by one or two bad hole scores that are not reflective of a player’s demonstrated ability. In addition, incomplete scores and/or scores where a player did not hole out on every hole can provide reasonable evidence of the player's ability and can be used for handicap purposes.

Rule 3 covers the circumstances where scores may be acceptable and how these hole scores should be adjusted.

### 3.1 Maximum Hole Score for Handicap Purposes

#### 3.1a Before a Handicap Index Has Been Established

For a player submitting their first scores to obtain an initial *Handicap Index*, the maximum score for each hole played is limited to $par + 5$ strokes (see Diagram 3.1a).

**Diagram 3.1a: Applying Maximum Hole Score When Handicap Index Not Established**

<table>
<thead>
<tr>
<th>Name: John Smith</th>

</tr>
<tr>
<td>Score 6 7 6 5 7 12 6 7 63</td>
<td></td>
<td>Adjusted gross score for handicap purposes</td>
</tr>
</tbody>
</table>

Maximum Hole Score = Par + 5
3.1b After a Handicap Index Has Been Established

For a player with an established Handicap Index, the maximum score for each hole played is limited to a net double bogey, calculated as follows:

\[ \text{Par of the hole} + 2 \text{ strokes} + \text{Any handicap stroke(s) that the player receives on that hole}^* \]

(*or minus any handicap stroke(s) that a plus handicap player gives back on that hole.)

(See Diagram 3.1b.)

- A net double bogey is equal to the lowest score on a hole for which the player would achieve zero Stableford points.
- There is no limit to the number of holes in a round where a net double bogey adjustment may be applied.
- If, in the Terms of the Competition (see Rule 7.2a) or the handicap allowances, there are any restrictions on the number of strokes received, this restricted Playing Handicap should only be used for the purpose of the competition, for example to determine the:
  - Finishing positions and prize winners, and
  - Number of strokes given or received for different formats of play.

The player’s full, unrestricted Course Handicap should be used for all applications of net double bogey adjustments. For this procedure the Course Handicap is rounded to the nearest whole number (see Rule 6.1a/b).

- Where a Course Handicap is calculated at more than 54 and a player receives 4 or more strokes on a hole, the maximum hole score is par + 5 for handicap purposes.
- Adjusting a hole score to a net double bogey can be done either:
  - Automatically, when hole–by–hole score entry is used, or
  - By the player, when submitting an adjusted gross score for the round.
3.2 When a Hole is Not Played

3.2a Reason for Not Playing One or More Holes

There are various reasons why a round is not completed or one or more holes are not played during the round. Valid reasons might include:

- Fading light or weather preventing the continuation of play,
- Player injury or illness,
- A match finishing before the final hole,
• The course being played has fewer than 9 or 18-holes because:
  ○ A hole (or holes) has been declared out of play by the Committee for maintenance or reconstruction purposes, or
  ○ The Committee has organized a competition over a non-standard number of holes, for example during the winter months.
• Any other situations considered reasonable by the Committee.

If it is determined that the player does not complete a round or does not play one or more holes for an invalid reason, the score is not acceptable for handicap purposes. Invalid reasons might include:
• Weather that does not prevent the continuation of play.
• Not playing a particular hole on a golf course because the player knows it usually causes them difficulty and they are likely to return a high hole score.
• Not playing the final holes on a golf course in order to avoid submitting a high score (if playing badly) or a low score (if playing well).
• Any other situations considered unreasonable by the Committee.

If the Handicap Committee determines that the player’s actions were for the purpose of gaining an unfair scoring advantage, it may consider posting a penalty score to the player’s scoring record (see Rule 7.1b(ii)).

3.2b Score to Record When One or More Holes Not Played

A score from an incomplete round or when one or more holes have not been played may only be used for handicap purposes if, among other things:
• The round has been played over at least the minimum number of holes required for either a 9-hole or an 18-hole score to be acceptable (see Rule 2.2), and
• The reason for not completing the round was valid (see Rule 3.2a).

Where the Handicap Committee determines that one or more holes has not been played for a valid reason, a 9-hole or 18-hole Score Differential will be created using their expected score for the hole or holes not played.
Rule 3

Notes:

1. If the player’s reason for not playing one hole or more holes is considered invalid, the score is not acceptable for handicap purposes, but the Handicap Committee may consider posting a penalty score to the player’s scoring record (see Rule 7.1b(ii)).

2. If the outcome of a competition has been decided before all holes have been completed and the player decides to play any of the remaining holes, the actual scores for those remaining holes should be recorded.

3. A hole is considered to have been played if it has been started.

Rule 3.2b Clarifications:

3.2b/1 – Procedure for Calculating a Score Differential using an Expected Score

The calculation of an expected score is automated and is used to attribute a statistical value against any hole or holes not played within an acceptable 9-hole or 18-hole round so that a 9-hole or 18-hole Score Differential can be calculated, subject to other provisions set out within the Rules of Handicapping.

The procedure for calculating a Score Differential using an expected score can be summarized as follows:

1. An expected Score Differential for the hole or holes not played is calculated, based on a given Handicap Index and a course of standard difficulty.

2. A Score Differential for the holes played is calculated using the player’s actual scores and the rating value of the holes played.

3. The Score Differential from the holes played is combined with the expected Score Differential to produce either a 9-hole or 18-hole Score Differential.

3.2b/2 – Use of Net Par for a Hole Not Played

In certain circumstances, and only when approved by the Authorized Association, a score of net par can be used for a hole or holes not played, in place of the expected score. Examples of situations where a score of net par would be acceptable include:

- When the player is required to submit an adjusted gross score, including scores for any holes not played, or

- When one or more holes are out of play due to construction or maintenance, which affects all players over a period of time.
3.2b/3 – Designation of Holes Not Played

Where one or more holes have not been played during the round and the player is not required to submit an *adjusted gross score*, the player must submit hole-by-hole scores and designate which holes were not played as prescribed by the Authorized Association. This is to ensure that all of the procedures set out within the *Rules of Handicapping* can be carried out accurately, including the calculation of the *expected score* for the hole or holes not played.

3.3 When a Hole is Started But Player Does Not Hole Out

There are various circumstances that might result in a player starting a hole but not holing out. For example, when:

- The result of the hole has already been decided,
- A hole has been conceded in match play,
- A player’s partner has already posted a better score in a Four-Ball format and the player picks up, or
- A player has already reached their *net double bogey* limit on a specific hole.

When a player starts a hole but does not hole out for a valid reason, subject to other provisions set out within the *Rules of Handicapping*, the player must record their *most likely score* or *net double bogey*, whichever is lower, as appropriate for the situation and depending on the format of play.

The *most likely score* is:

- The number of strokes already taken to reach a position on a hole, plus
- The number of strokes the player would most likely require to complete the hole from that position, plus
- Any penalty strokes incurred during play of the hole.
Most likely scores should be determined on any hole in accordance with the following guidelines:

<table>
<thead>
<tr>
<th>Position of the Ball</th>
<th>Strokes to be Added</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the ball lies on the putting green, and is no more than 5 feet (1.5 metres) from the hole:</td>
<td>Add one additional stroke.</td>
</tr>
<tr>
<td>If the ball lies between 5 feet (1.5 metres) and 20 yards (20 metres) from the hole:</td>
<td>Add 2 or 3 additional strokes, depending on the position of the ball, the difficulty of the green and the ability of the player.</td>
</tr>
<tr>
<td>If the ball lies more than 20 yards (20 metres) from the hole:</td>
<td>Add 3 or 4 additional strokes, depending on the position of the ball, the difficulty of the green and the ability of the player.</td>
</tr>
</tbody>
</table>

(See Diagram 3.3.)
Diagram 3.3: Most Likely Score When a Hole Is Started But Player Does Not Hole Out

- If the ball lies on the putting green, no more than 5 feet (1.5 metres) from the hole.
  
  Add 1 additional stroke

- If the ball lies between 5 feet (1.5 metres) and 20 yards (20 metres) from the hole.
  
  Add 2 or 3 additional strokes depending on position of ball, difficulty of green and ability of player

- If the ball lies more than 20 yards (20 metres) from the hole.
  
  Add 3 or 4 additional strokes depending on position of ball, difficulty of green and ability of player
Notes:

1. There is no limit to the number of most likely scores that can be recorded within a player’s adjusted gross score, provided that the failure to hole out is for a valid reason and not for the purpose of gaining an unfair scoring advantage.

2. For players with an established Handicap Index, the most likely score on any hole cannot exceed net double bogey for handicap purposes.

3. When a player is submitting scores for an initial Handicap Index, the most likely score on any hole cannot exceed par plus 5 strokes.

4. If the format of play does not allow a player to pick up their ball before holing out, for example an individual gross score or net score stroke-play competition, the player will be disqualified from the competition (see Rule 2.1b).

5. In a Maximum Score format of stroke play, there may be situations where a player has not reached their net double bogey score before reaching the maximum score as determined by the Terms of the Competition. In such cases, the player should record either a most likely score or net double bogey, whichever is the lower score (see Rules of Golf, Rule 21.2).

Rule 3.3 Clarifications:

3.3/1 – Clarification of the Meaning of Most Likely Score for Handicap Posting and When It Should Be Used

A most likely score is used to record a player’s probable score on a hole, when the hole has been started but the player did not hole out their ball. It should be a reasonable assessment of the number of strokes needed to complete the hole.

For example, in a Four-Ball match-play competition, a player’s partner holes their ball from off the putting green for three. The player’s ball lies 15 yards (14 metres) away from the hole in four strokes and the score for the side cannot be improved. To save time, the player may pick up and record a most likely score for handicap purposes.

Based on the most likely score guidelines, the player would record a score of six or seven for handicap purposes (four strokes taken plus two or three additional strokes).
Submitting a Score

**Principle of the Rule:**

Rule 4 covers the process for the submission of acceptable scores for handicap purposes, both to obtain an initial Handicap Index and to maintain an established Handicap Index.

Timely submission of scores by a player, or anyone else responsible or authorized to submit scores on their behalf, allows for responsive updates and provides a real-time measure of the player’s golfing ability.

This Rule also outlines the information that players are required to submit for acceptable scores and how these scores can be verified.

### 4.1 Information Required for Scoring Record

#### 4.1a General

(i) A score posted into the player’s *scoring record* must be:

- An *acceptable score* (see Rule 2.1), and
- Recorded in the correct chronological order, even if the score is submitted on a day later than the date the round was played.

(ii) A score must be posted to the player’s *scoring record* in the form prescribed by the *Authorized Association*. This may be in the form of:

- Hole–by–hole scores (strongly recommended; (see Clarification 3.2b/1 for Designation of Holes Not Played)),
- An *adjusted gross score* or
- Stableford points.
Rule 4

(iii) Upon submission of a score, a player must ensure that the following information is provided for inclusion in their **scoring record**:

- Date of the round played,
- *Course Rating* and *Slope Rating* for the set of tees played, and
- Where applicable, the *par* and *stroke index* of each hole.

This information is generally contained on the scorecard.

(iv) The *Handicap Committee* should ensure a submitted score is posted to a player’s **scoring record** as soon as possible.

(v) A score submitted on any day after the round was played should also include the *playing conditions calculation* (see Rule 5.6), in addition to the information required under (iii) above.

(See Appendix B for sample **scoring records**.)

**Rule 4.1a Clarifications:**

**4.1a/1 – When Par on Scorecard Differs From Par Recorded in Golf Club Terminal or Other Device Used For Submitting Scores**

The *Authorized Association*, or at the discretion of the National Association the *golf club*, is responsible for adjudicating *par*. Therefore, in situations where a player is required to submit adjusted hole scores for handicap purposes and the correct *par* values for the *golf course* played are unclear, the player should confirm the correct *par* values before submitting their hole scores for handicap purposes.

**4.1a/2 – Other Information Relating to Score**

The *Authorized Association* may require players to submit other information relating to the score, including but not restricted to the following:

- Name of marker.
- Reason why a hole or holes were not played.
- Score type designation, to assist with the *handicap review procedure* (see Rule 7.1a and Appendix B, Note 5).
4.1b For Scores Prior to Establishing a Handicap Index

Scores submitted by a player to obtain an initial Handicap Index must be submitted as either:

- Hole–by–hole scores (strongly recommended), or
- 9–hole or 18–hole adjusted gross scores.

For full details of a player’s scoring record, refer to Appendix B.

4.2 Eligibility to Submit a Score

An acceptable score must be submitted by the player, the Handicap Committee, the Committee in charge of the competition or by anyone else authorized by the player.

4.3 Time Frame for Submitting a Score

A player should submit their score as soon as possible on the day of play, after completion of their round, and before midnight (local time).

If a player does not submit their score on the day of play:

- Their Handicap Index will not be updated in time for the next day (see Rule 5.4), and
- Their score will not be included in the daily playing conditions calculation (PCC) (see Rule 5.6).

When a score is posted to the player’s scoring record after the day of play and the PCC for the day the round was played has already been performed, the PCC adjustment should still be applied to the player’s Score Differential calculation even though the player’s score was not included in the PCC.

If a score is submitted out of sequence:

- The score should be added to the player’s scoring record in the correct chronological order.
- The published PCC adjustment for the golf course played, on the day the round was played, should be applied to the Score Differential calculation.
- The player’s Handicap Index should be recalculated.

Note: The Handicap Committee should investigate any repeated occurrence of a player failing to submit a score in a timely manner (see Rule 7.1b).
If there is no evidence that the player has acted for the purpose of gaining an unfair advantage, all scores submitted in the intervening period should stand for handicap purposes.

**4.4 Certification of a Score**

A score submitted for handicap purposes must be made available for peer review as soon as possible after completion of the round. To facilitate the process of peer review:

(i) A player, or someone authorized by the player, must submit their score as soon as possible after completion of the round, and

(ii) The Handicap Committee should ensure a submitted score is posted to the player’s scoring record as soon as possible.

**Rule 4.4 Clarifications:**

**4.4/1 – Clarification of Meaning of Peer Review as a Method of Certification of Scores**

*Peer review* is normally conducted by someone:

- Playing in the same group or who was present during the round, and/or
- Who is a member of the same golf club as the player.

In all cases, it must be someone who:

- Has formed a reasonable basis from which to provide support for a score that has been posted or challenge the player on any anomalies in the posted score, or
- Has knowledge of the player’s demonstrated ability and can reasonably verify or challenge the Handicap Index issued to the player.

Challenges or disputes should be raised with the player and/or reported to the Handicap Committee for consideration.

To facilitate the process of peer review, player scoring records must be accessible to all other members of the golf club (see Appendix B).
4.5 Number of Scores Required for Initial Handicap Index

To obtain an initial Handicap Index, a player must submit acceptable scores from a minimum of 54 holes.
Handicap Calculation and Updating a Handicap Index

RULES 5-6
Rule 5

Handicap Index Calculation

**Principle of the Rule:**
A player’s Handicap Index should represent their demonstrated ability and, where appropriate, be responsive to scores that are inconsistent with their demonstrated ability.

Rule 5 covers the process of calculating a Handicap Index and incorporates the safeguards needed to help ensure that a player’s Handicap Index remains reflective of their ability and that equity is retained for all golfers. It includes mechanisms that:

- Take into consideration the conditions in which a round was played.
- Remember previously demonstrated ability within a defined period of time.
- Cap the upward movement of a player’s Handicap Index within a defined period of time.
- Apply additional adjustments to a player’s Handicap Index when an exceptional score is submitted.

### 5.1 Calculation of a Score Differential

#### 5.1a For an 18-hole Score

An 18-hole Score Differential is calculated as follows and rounded to the nearest tenth, with .5 rounded upwards:

\[
\text{Score Differential} = \frac{113}{\text{Slope Rating}} \times (\text{adjusted gross score} - \text{Course Rating} - \text{PCC adjustment})
\]

Note: The PCC adjustment ranges from −1.0 to +3.0 (see Rule 5.6).

**Incomplete 18-hole Round**

If fewer than 18 holes have been played but more than 9 holes, an 18-hole score is only acceptable for handicap purposes if the reason for not completing the
round was considered valid (see Rule 3.2a).

- If the reason was considered valid, an 18–hole Score Differential is created using the player’s expected score for the hole or holes not played (see Rule 3.2b).

- If the reason was considered invalid, the score is not acceptable for handicap purposes. However, depending on the circumstances, the Handicap Committee may consider applying a penalty score (see Rule 7.1b).

For an 18–hole score to be acceptable for handicap purposes over a course which consists of fewer than 18 holes, a Course Rating and Slope Rating must be issued over 18 designated holes. The calculation of an 18–hole Score Differential is carried out using the normal procedures as set out within the Rules of Handicapping.

**5.1b For a 9-hole Score**

A 9–hole Score Differential is calculated as follows:

\[
\text{9-hole Score Differential} = \left(113 \div \text{9-hole Slope Rating}\right) \times \left(\text{9-hole adjusted gross score} - \text{9-hole Course Rating} - (0.5 \times PCC adjustment)\right)
\]

An 18–hole Score Differential is created by combining the 9–hole Score Differential for the 9 holes played with the player’s expected score over 9 holes.

The 9–hole Score Differential remains unrounded until after it has been combined with the player’s expected score. The 18–hole Score Differential is then rounded to the nearest tenth, with .5 rounded upwards.

If fewer than 9 holes have been played, the score is not acceptable for handicap purposes.

For a 9–hole score to be acceptable for handicap purposes over a course which consists of fewer than 9 holes, a Course Rating and Slope Rating must be issued over 9 designated holes. The calculation of a 9–hole Score Differential is carried out using the normal procedures as set out within the Rules of Handicapping.

**5.1c Rounding of Minus Score Differentials**

When an adjusted gross score calculates lower than the Course Rating, this results in the Score Differential being a negative number. Where this occurs, rounding is made upward towards 0.
Rule 5

For example:

- When a Score Differential is calculated as \(-1.54\), it is rounded to \(-1.5\)
- When a Score Differential is calculated as \(-1.55\), it is rounded to \(-1.5\)
- When a Score Differential is calculated as \(-1.56\), it is rounded to \(-1.6\)

5.2 Calculation of a Handicap Index

5.2a For Fewer Than 20 Scores

A Handicap Index is calculated from the lowest Score Differentials in the scoring record. If a scoring record contains fewer than 20 Score Differentials, the table below is used to determine the number of Score Differentials to be included in the calculation and any adjustment that may apply. The result of the calculation is rounded to the nearest tenth.

<table>
<thead>
<tr>

</table>

Allocation of an Initial Handicap Index

(i) If a player’s initial Handicap Index is calculated to be greater than the maximum Handicap Index of 54.0 (see Rule 5.3), the player is allocated a Handicap Index of 54.0.

(ii) Based on any additional evidence available about a player’s demonstrated ability, a Handicap Committee may modify a player’s initial Handicap Index upward or downward, up to a maximum of 54.0 (see Rule 7.1a).
5.2a Clarifications:

5.2a/1 – Modification of a Player’s Initial Handicap Index Due to Evidence of Previous Ability

A player submits three scores to obtain an initial Handicap Index, which result in calculated Score Differentials of 15.3, 15.2 and 16.6.

This would result in an initial Handicap Index of:

<table>
<thead>
<tr>
<th>Lowest Score Differential</th>
<th>Adjustment</th>
<th>Initial Handicap Index</th>
</tr>
</thead>
<tbody>
<tr>
<td>15.2</td>
<td>2</td>
<td>13.2</td>
</tr>
</tbody>
</table>

The Handicap Committee is aware that the player, who is rejoining a golf club after many years out of the game, had played well as a junior golfer and maintained a Handicap Index of around 8.0.

Based on the evidence available, the Handicap Committee may adjust the player’s calculated initial Handicap Index to better reflect their previously demonstrated ability.

5.2a/2 – Modification of a Player’s Initial Handicap Index When Subsequent Scores Are Significantly Different Than Expected

A player submits three scores to obtain an initial Handicap Index, which result in calculated Score Differentials of 40.7, 42.4 and 36.1.

This would result in an initial Handicap Index of:

<table>
<thead>
<tr>
<th>Lowest Score Differential</th>
<th>Adjustment</th>
<th>Initial Handicap Index</th>
</tr>
</thead>
<tbody>
<tr>
<td>36.1</td>
<td>2</td>
<td>34.1</td>
</tr>
</tbody>
</table>

The player then goes on to submit three more scores which result in calculated Score Differentials of 45.9, 43.6 and 45.0.

After these six scores, the player’s Handicap Index would be:

<table>
<thead>
<tr>
<th>Average of Lowest Two Score Differentials</th>
<th>Adjustment</th>
<th>Initial Handicap Index</th>
</tr>
</thead>
<tbody>
<tr>
<td>38.4</td>
<td>1</td>
<td>37.4</td>
</tr>
</tbody>
</table>
In reviewing the player’s calculated Handicap Index against their scores, the Handicap Committee may conclude in this case that the -1 adjustment should be removed to ensure the calculated Handicap Index better reflects the player’s ability.

5.2b For 20 Scores

A Handicap Index is calculated from the lowest Score Differentials in the scoring record. If a scoring record contains at least 20 Score Differentials, the procedure for calculating a Handicap Index is:

- Average the lowest 8 of the most recent 20 Score Differentials (which include any adjustments for exceptional scores and/or a Committee review) and round to the nearest tenth.
- Compute the difference between the average of the lowest 8 Score Differentials and the Low Handicap Index.
  - If the difference is greater than 3, the soft cap calculation is applied.
  - If the difference is greater than 5 after application of the soft cap, then the hard cap is applied.

(See Rule 5.8.)

5.2c For Plus Handicap Index

When there are 20 Score Differentials in a player’s scoring record and the Handicap Index calculates as a negative figure, this represents a plus Handicap Index.

When a player’s initial Handicap Index calculates at the lower end of the handicap range for both men and women, the Handicap Committee must follow any procedures established by the Authorized Association before issuing a Handicap Index below a specified level (see Rule 5.2a).
Rule 5.2c Clarifications:

5.2c/1 – Designation of a Plus (+) Handicap Index

The Rules of Handicapping contain a number of references to a ‘Plus Handicap’, which is the terminology traditionally used for a golfer who has achieved a Handicap Index better than Scratch (0.0).

However, when calculating a net score, the correct denotation of a ‘plus’ handicap is a negative, and this mathematical contradiction can lead to a lack of consistency in the way players denote their Handicap Index on entry forms and how software providers code their calculators.

In an effort to achieve consistency across all jurisdictions, the following guidance is provided:

- Players with a ‘Plus Handicap’ should be encouraged to always prefix their Handicap Index with a ‘Plus’ sign (+).
- All other players should be encouraged to refrain from using any prefix.
- The default assumption for competition organizers should be that a Handicap Index pre-fixed with a Plus (+) sign is a Plus Handicap. Any Handicap Index pre-fixed with a negative (–) sign should be queried.

5.3 Maximum Handicap Index

The maximum Handicap Index that can be issued to a player is 54.0.

Note: The Committee in charge of a competition may set a maximum limit for entry (see Rule 7.2).

5.4 Frequency of Revision of a Handicap Index Update

A player’s Handicap Index should be updated no later than the day after a score was submitted, or as soon as possible thereafter.

In a situation when a new round is played before the player’s Handicap Index has been updated, including when multiple rounds are played on the same day, it is recommended that the player uses their existing Handicap Index. However, in certain circumstances, the Committee in charge of the competition (or the Handicap Committee) has the discretion to decide what Playing Handicap the player should use (see Rule 7.2).
Rule 5

Rule 5.4 Clarifications:

5.4/1 – Example Situation When Committee in Charge of a Competition May Adjust a Player’s Playing Handicap

In a situation where a player has performed exceptionally well in an authorized format of play during a morning round and is playing a competition round later the same day, as the player’s Handicap Index will not be updated until the next day, the Committee in charge of the competition may decide to adjust the player’s Playing Handicap.

The Committee should consider all of the information available before deciding whether to adjust the player’s Playing Handicap, including what impact the score may have had on the player’s Handicap Index and whether the player would obtain any unfair advantage because their Handicap Index has not been updated.

5.4/2 – Golf Club Responsibility to Post Scores As Soon As Possible

Where it is the responsibility of a golf club to post scores at the end of each day, this must be done as soon as possible and preferably before midnight to support the Rules of Handicapping. This is important because it:

- Ensures that a player’s Handicap Index is updated as soon as possible after the round was played (see Rule 5.4).
- Allows for the playing conditions calculation to be carried out (see Rule 5.6).
- Ensures that, where appropriate, scores are available for verification by peers.
- Enables the Handicap Committee to carry out its other responsibilities (see Rule 7.1b).

Failure to carry out this responsibility may compromise the integrity of the Rules of Handicapping.

5.5 Ageing of Scores and Lapsing of a Handicap Index

A score continues to be part of the Handicap Index calculation as long as it remains within the player’s most recent 20 scores recorded, regardless of the age of the score.

Where applicable, a 9-hole score waiting to be combined with another 9-hole score will be retained until it becomes older than the twentieth oldest 18-hole score in the scoring record, after which it is discarded.
A Handicap Index only lapses if a player is no longer a member of at least one golf club.

Note: A player’s scoring record should be retained wherever possible. This will assist a Handicap Committee if the player obtains a Handicap Index again in the future.

### 5.6 Playing Conditions Calculation

**Principle of the Rule:**

Course Ratings are based on normal playing conditions, but the difficulty of a golf course can vary substantially from day to day, due to:
- Course conditions,
- Weather conditions, and/or
- Course set-up.

The playing conditions calculation (PCC) determines whether playing conditions on the day differed from normal conditions to the extent that an adjustment is needed to compensate. It is a daily statistical procedure that compares the scores submitted by players on the day against expected scoring patterns.

The purpose of this feature within the handicap calculation is to recognize that an average score submitted in harder playing conditions may be better than a good score submitted in easier playing conditions. Unadjusted, such a score may be omitted from the Handicap Index calculation.

If the PCC determines that acceptable scores submitted are in line with expected scoring patterns, then no adjustment is made.

The calculated adjustment is dependent upon:
- Whether significantly fewer players than anticipated attained their expected score and, consequently, conditions are determined to be harder than normal.
- Whether significantly more players than anticipated attained their expected score and, consequently, conditions are determined to be easier than normal.
Rule 5

The *playing conditions calculation (PCC)*:

- Is generally performed only once for a day.
- Considers *acceptable scores* submitted on a *golf course* each day and requires at least eight *acceptable scores* to determine if an adjustment is required.
- Includes only *acceptable scores* submitted by players with a *Handicap Index* of 36.0 or below.
- Equals zero if fewer than eight *acceptable scores* are submitted.
- Where applicable, does not include scores that are scaled up to 9-hole or 18-hole scores.
- Can determine an adjustment of −1.0, 0.0, +1.0, +2.0 or +3.0 and is applied in the calculation of *Score Differentials* for all players.

**Rule 5.6 Clarifications:**

**5.6/1 – Procedure for Performing Playing Conditions Calculation**

The *playing conditions calculation (PCC)* is an automatic calculation and can be summarized as follows:

1. The *expected score* is calculated for each eligible player.
2. The expected standard deviation of *Score Differentials* at the *golf course* is calculated, incorporating all applicable *Slope Ratings*.
3. The number of players who scored better or worse than expected on the day is established.
4. The proportion of players who submitted a score equal to, better than or worse than their expected scoring range is used to determine whether a *PCC* adjustment is required.
5. If an adjustment is required, a determination is made about how much harder or easier the *golf course* played that day.
6. Based on these calculations, the final *PCC* adjustment required for play on that day is determined.
7. A *PCC* adjustment is applied as a whole number.

Notes:

- For the application of a *PCC* adjustment in the calculation of a *Score Differential*, see Rule 5.1a (for an 18-hole score) and Rule 5.1b (for a 9-hole score).
- 9-hole *acceptable scores* are doubled for inclusion in the *PCC* along with a doubled 9-hole *Course Rating* and the 9-hole *Slope Rating*. 
• The PCC is applied to all acceptable scores that are submitted on a day of play and retrospectively for scores played on that day but submitted at a later date.

5.6/2 – Circumstances That May Warrant More Than One Playing Conditions Calculation on a Single Day

Rule 5.6 recommends that only one playing conditions calculation (PCC) is performed for the day. However, there may be circumstances that warrant a separate PCC to be performed for part of the day or for a certain competition. For example, when:

• There is extreme variation in weather during two distinct parts of the day.
• The make-up of the field in a competition being played on the day is significantly different from the make-up of the players participating in general play rounds on the same day.

5.6/3 – How to Perform a Separate Playing Conditions Calculation for a Certain Competition and What Adjustment to Apply to General Play Rounds Played on the Same Day

In circumstances when a separate playing conditions calculation (PCC) is performed for a certain competition:

• Only scores from those players who have participated in the competition are considered in the separate PCC.

• Any calculated adjustment from the separate PCC will be applied only to the calculation of the Score Differentials of players who have participated in the competition.

• For all other players who have played at the same golf course on the day, the PCC for the day is applied, which uses all eligible scores for the day (including the scores of the players who have participated in the competition).

5.6/4 – Player Plays Multiple Rounds on the Same Course on the Same Day and a Separate Playing Conditions Calculation is Performed

When playing two or more rounds on the same golf course on the same day and a separate PCC is performed for one or more of the rounds, a different PCC adjustment may be applied to each of a player’s calculated Score Differentials.

5.6/5 – Round Played Away and Score Returned to Home Club

When a player returns a score back to their home club after playing a round at an away golf course, the playing conditions calculation (PCC) for that golf course
on the day the round was played should be retrieved and used to calculate the player’s Score Differential before their Handicap Index is revised.

5.6/6 – Performing the Playing Conditions Calculation at a Golf Club With 27 Holes

A golf club has three 9-hole golf courses known as the South, East and West courses. The design and layout of the three courses allows golfers to play (a) only 9 holes on any golf course, or (b) 18 holes in any combination of 9 holes (South/South, South/East, South/West, East/East, East/West and West/West).

The playing conditions calculation (PCC) is performed for any 18-hole golf course that has been issued a Course Rating and Slope Rating.

Provided all of the criteria set out in Rule 5.6 are satisfied, a PCC is performed every day, for each 18-hole combination.

5.6/7 – Application of Playing Conditions Calculation When Playing only 9 Holes at a Golf Club with 27 Holes

A golf club has three 9-hole golf courses known as the South, East and West courses. The design and layout of the three courses allows golfers to play (a) only 9 holes on any golf course, or (b) 18 holes in any combination of 9 holes (South/South, South/East, South/West, East/East, East/West and West/West).

For a player who plays only 9 holes on the South golf course:

- Their score will be entered into the playing conditions calculation (PCC) for each of the South/South, South/East and South/West 18-hole combinations.
- Their score will be doubled, using the same 9-hole Course Rating and Slope Rating as the 9 holes played.
- Provided all of the criteria set out in Rule 5.6 are satisfied, a PCC will be performed for each 18-hole combination.
- 50% of the PCC adjustment for the South/South golf course is applied to the calculation of the player’s Score Differential.
- If no PCC is performed for the South/South golf course, no PCC adjustment will be applied to the calculation of the player’s Score Differential. This is even if a PCC adjustment is performed for other 18-hole combinations involving the South golf course.
5.7 Low Handicap Index

The Low Handicap Index represents the demonstrated ability of a player over the 365-day period preceding the day on which the most recent score in their scoring record was played and provides a reference point against which the current Handicap Index can be compared.

- A Low Handicap Index is established once a player has at least 20 acceptable scores in their scoring record.

- Once a player has established a Low Handicap Index, it is re-evaluated every time a new acceptable score is submitted and must be displayed in the player’s scoring record.

- A newly-determined Low Handicap Index is considered in the processing of the player’s next acceptable score whenever the next round is submitted. A player’s Low Handicap Index may become more than 365 days old in the period between two rounds being played.

- Where a Handicap Committee-applied adjustment reduces a player’s Handicap Index, the adjusted Handicap Index resets the Low Handicap Index to the adjusted Handicap Index, unless a lower Handicap Index is still eligible (See Rule 7.1a).

- Where a Handicap Committee-applied adjustment increases a player's Handicap Index, the Committee should consider resetting the player’s Low Handicap Index to the same value as the adjusted Handicap Index.
Rule 5.7 Clarifications:

5.7/1 – Circumstances When a Player’s Low Handicap Index Becomes More Than 365 Days Old

Rule 5.7 states that a player’s Low Handicap Index may become more than 365 days old in the period between two rounds being played. As a result, a Low Handicap Index that is more than 365 days old may still be considered in the calculation of a player’s Handicap Index.

For example:

After submitting a score on 1 March 2025, a player’s Handicap Index calculates at 12.3. Their Low Handicap Index at the time is 10.6, established on 1 May 2024.

When the player submits their next score on 1 June 2025, the Low Handicap Index of 10.6 will still be considered in the calculation of their updated Handicap Index even though it is more than 365 days old. This is because the 365–day timeframe precedes the date on which the most recent score on the player’s scoring record was played, which in this case is the period between 1 March 2025 and 1 March 2024. Once their updated Handicap Index is calculated, the new Low Handicap Index will be found within the 365–day period preceding 1 June 2025.

5.7/2 – Circumstance When the Low Handicap Index is the Current Handicap Index

After submitting a score on 1 April 2024, a player takes a break from golf and does not submit another score until 1 July 2025. In calculating the player’s updated Handicap Index, the player’s Low Handicap Index in the 365 days preceding 1 April 2024 is used as a reference point.

The player then plays another round on 1 August 2025, and the 365–day period preceding 1 July 2025 is used to locate the player’s Low Handicap Index, but no other scores have been submitted during that timeframe. Therefore, in this situation, the player’s current Handicap Index is their Low Handicap Index.
**5.8 Limit on Upward Movement of a Handicap Index**

There are two trigger points within the *cap* procedure:

(i) **The soft cap.** The *soft cap* is triggered when the difference between a player’s newly calculated *Handicap Index* and their *Low Handicap Index* is greater than 3.0 strokes.

When a calculated *Handicap Index* increase is greater than 3.0 strokes, the value above 3.0 strokes is restricted to 50% of the increase.

(ii) **The hard cap.** The *hard cap* triggers to restrict the amount by which a player’s *Handicap Index* can increase, after application of the *soft cap*, to no more than 5.0 strokes above their *Low Handicap Index*.

There is no limit on the amount by which a player’s *Handicap Index* can decrease.

The *soft cap* and *hard cap* procedures start to take effect only after the *Low Handicap Index* has been established.

(See Diagram 5.8.)

---

**DIAGRAM 5.8: THE SOFT CAP AND HARD CAP**

[Diagram showing the soft cap and hard cap zones with specific values and annotations.]

- **LOW HANDICAP INDEX**: Reference Point
- **SOFT CAP ZONE**: Indicates the threshold for the soft cap.
- **HARD CAP CEILING**: Shows the limit for the hard cap.
5.9 Submission of an Exceptional Score

When an exceptional score is posted to a player’s scoring record, the Handicap Index will be reduced in accordance with the following adjustment table:

<table>
<thead>
<tr>
<th>Number of strokes the Score Differential is lower than a player’s Handicap Index in effect when the round was played</th>
<th>Exceptional score reduction</th>
</tr>
</thead>
<tbody>
<tr>
<td>7.0 – 9.9</td>
<td>–1.0</td>
</tr>
<tr>
<td>10.0 or more</td>
<td>–2.0</td>
</tr>
</tbody>
</table>

- Any reduction is based on the difference between the Score Differential (unrounded) and the player’s Handicap Index.
- Reductions for multiple exceptional scores are applied cumulatively.
- A reduction is automatically applied within the calculation of a player’s updated Handicap Index following the submission of an exceptional score.
- A reduction for an exceptional score is applied by adjusting each of the most recent 20 Score Differentials recorded in the player’s scoring record, which includes the exceptional score. As a result, the impact of the reduction will remain after the next score is submitted but will dilute over time as new scores are submitted.

Where there are fewer than 20 Score Differentials in a player’s scoring record at the time an exceptional score is submitted, the reduction is applied by adjusting all of the Score Differentials recorded in the player’s scoring record, which includes the exceptional score.

- Additional handicap review notifications will be generated for the Handicap Committee’s consideration, when:
  - Multiple exceptional score reductions are applied to a player’s Handicap Index.
  - A Score Differential is 10.0 strokes or more below a player’s Handicap Index in effect when that round was played and an exceptional score reduction of –2.0 is triggered.

- The Handicap Committee is permitted to override any adjustment for an exceptional score if it considers that the adjustment would result in a player’s Handicap Index not being a fair reflection of their demonstrated ability (see Rule 7.1a).

(See Diagram 5.9.)
**DIAGRAM 5.9: APPLICATION OF AN ADJUSTMENT FOR AN EXCEPTIONAL SCORE**

1. **Player submits score**
2. **Score Differential calculated**
3. **Is Score Differential 7.0 strokes or more below Handicap Index when round played?**
   - **NO** → **Score is added to the player’s scoring record**
   - **YES**
     - **Is Score Differential 10.0 strokes or more below Handicap Index when round played?**
       - **YES**
         - **Apply a -2 adjustment to each of the most recent 20 Score Differentials in the player’s scoring record, including the exceptional score**
           (Note: If there are fewer than 20 scores in a player’s scoring record, the -2 adjustment is applied to all recorded Score Differentials)
         - **Apply any other applicable exceptional scores or Committee applied adjustments**
       - **NO**
         - **Apply a -1 adjustment to each of the most recent 20 Score Differentials in the player’s scoring record, including the exceptional score**
           (Note: If there are fewer than 20 scores in a player’s scoring record, the -1 adjustment is applied to all recorded Score Differentials)
         - **Update Handicap Index**
           **Note:** The Handicap Committee has discretion to override any exceptional score adjustment
Course Handicap and Playing Handicap Calculation

Principle of the Rule:

The Course Handicap calculation converts a Handicap Index to the number of strokes a player requires to play any golf course with a Course Rating and Slope Rating. This allows portability of a player’s Handicap Index wherever they play. The Playing Handicap calculation enables equity amongst players of all handicap levels within different formats of the game. A Playing Handicap is calculated by applying the appropriate handicap allowance to a player’s Course Handicap. For formats of play where a handicap allowance of 100% is adopted, the Playing Handicap will be the same as the Course Handicap.

Course Handicap – For handicap purposes, a Course Handicap is used to determine the number of strokes that a player receives (or gives) on any golf course and for the correct application of net double bogey and net par adjustments.

Playing Handicap – For equity purposes, the Playing Handicap calculation determines the number of strokes each player gives or receives, to ensure that all players can enjoy a fair and equal game when playing with or competing against one another.

6.1 Course Handicap Calculation

6.1a For an 18-hole Round

An 18-hole Course Handicap is calculated as follows:

\[
\text{Course Handicap} = \text{Handicap Index} \times \left( \frac{\text{Slope Rating}}{113} \right) + (\text{Course Rating} - \text{par})
\]
Notes:

1. If an 18–hole round is being played over the same 9 holes from the same tees and there is no 18–hole Course Rating, the 18–hole Course Handicap is calculated as follows:

\[
\text{Course Handicap} = \frac{\text{Handicap Index} \times (9\text{-hole Slope Rating} \div 113)}{2} + (2 \times 9\text{-hole Course Rating} - 2 \times 9\text{-hole par})
\]

2. Rounding to the nearest whole number is the final step of the calculation.

**6.1b For a 9-hole Round**

A 9–hole Course Handicap is calculated as follows:

\[
\text{Course Handicap} = \frac{(\text{Handicap Index} \div 2) \text{ (rounded to the nearest tenth)}}{2} \times \frac{(9\text{-hole Slope Rating} \div 113)}{2} + (9\text{-hole Course Rating} - 9\text{-hole par})
\]

Rounding to the nearest whole number is the final step of the calculation.

(See Appendix E for guidance on stroke index allocation for 9–hole rounds.)

**Rule 6.1b Clarifications:**

**6.1b/1 – Use of 9-Hole Course and Slope Ratings in the Calculation of a 9-hole Course Handicap**

When an Authorized Association issues Course Ratings and Slope Ratings to golf clubs, the 18–hole ratings should also be presented with front nine and back nine Course Ratings and Slope Ratings. For example:

<table>
<thead>
<tr>
<th></th>
<th>White Tees (Men)</th>
<th></th>
<th>White Tees (Women)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Course Rating</td>
<td>Slope Rating</td>
<td>Course Rating</td>
<td>Slope Rating</td>
</tr>
<tr>
<td><strong>18-Holes</strong></td>
<td>73.1</td>
<td>132</td>
<td>75.5</td>
<td>138</td>
</tr>
<tr>
<td><strong>Holes 1-9</strong></td>
<td>36.1</td>
<td>132</td>
<td>37.3</td>
<td>135</td>
</tr>
<tr>
<td><strong>Holes 10-18</strong></td>
<td>37.0</td>
<td>131</td>
<td>38.2</td>
<td>141</td>
</tr>
</tbody>
</table>

The calculation of a 9–hole Course Handicap must use the correct Course Rating and Slope Rating for the 9–hole golf course being played.
Note: The calculated 18-hole and 9-hole Course Handicap is rounded to the nearest whole number, with .5 rounded upwards, for the purpose of:

- Applying adjustments for maximum hole score (see Rule 3.1) and when a hole is not played (see Rule 3.2).
- Where applicable, calculating a Score Differential.

Otherwise, the full calculated value is retained and rounding occurs only after the Playing Handicap calculation.

**6.2 Playing Handicap Calculation**

**6.2a Standard Calculation**

A Playing Handicap is calculated as follows:

\[
\text{Playing Handicap} = \text{Course Handicap (unrounded)} \times \text{handicap allowance}
\]

The calculated Playing Handicap is rounded to the nearest whole number, with .5 rounded upwards.

For recommended handicap allowances, see Appendix C.

**Rule 6.2a Clarifications:**

**6.2a/1 – Use of Full Calculated Value of Course Handicap**

*Handicap allowances* are designed to provide equity for players of all levels of ability in each format of play (see Appendix C) and are applied to a player’s Course Handicap as the final step in the calculation of their Playing Handicap. To avoid any undue effect of double rounding, *handicap allowances* should be applied to the unrounded Course Handicap.

Approximately 25% of the time, double rounding can produce Playing Handicaps that are significantly different and counter intuitive to players. For example, two players with a Handicap Index up to 2 strokes apart could both receive the same calculated Playing Handicap, see below:

\[
\begin{align*}
\text{Course Rating} &= 71.0 \\
\text{Slope Rating} &= 125 \\
\text{Par} &= 71 \\
\text{Format} &= \text{Four-Ball stroke play (Handicap Allowance 85%)}
\end{align*}
\]
Rule 6

### Playing Handicap Calculation (using rounded Course Handicap)

<table>
<thead>
<tr>
<th></th>
<th>Player A</th>
<th>Player B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Handicap Index</td>
<td>8.6</td>
<td>10.3</td>
</tr>
<tr>
<td>Course Handicap (Rounded)</td>
<td>10</td>
<td>11</td>
</tr>
<tr>
<td>Playing Handicap (85%)</td>
<td>9</td>
<td>9</td>
</tr>
</tbody>
</table>

This does not occur when the *handicap allowances* are applied to the unrounded Course Handicap (see below):

<table>
<thead>
<tr>
<th></th>
<th>Player A</th>
<th>Player B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Handicap Index</td>
<td>8.6</td>
<td>10.3</td>
</tr>
<tr>
<td>Course Handicap (Unrounded)</td>
<td>9.5132...</td>
<td>11.3938...</td>
</tr>
<tr>
<td>Playing Handicap (85%)</td>
<td>8</td>
<td>10</td>
</tr>
</tbody>
</table>

For the other 75% of the time, there would be no difference in the result.

In limited circumstances, for example when a player is required to calculate their own *Playing Handicap* and they do not have easy access to their unrounded Course Handicap, for practical purposes, the *handicap allowance* may be applied to the rounded Course Handicap.

Note: Where no *handicap allowance* is applied or it is set at 100%, the *Playing Handicap* is the same as the rounded *Course Handicap* unless an adjustment for multiple tees is required.

### 6.2b Calculation When Multiple Tees Are Used in a Competition

For the purposes of this Rule:

- Stroke play refers to gross score, net score or Maximum Score formats of play.
- Stableford and Par/Bogey formats of play are considered separately.

When a competition is played from two or more sets of tees (such as mixed gender or mixed ability events), depending on the format of play and any difference in *par* between tees, additional strokes may need to be added to the standard calculation of the *Playing Handicap* for equity purposes and to determine finishing positions, results and prizes.
(i) **Stroke Play and Match Play formats** (where results are recorded as gross or net scores). A player competing from a set of tees with a higher *par* must receive additional strokes for the round, equal to the difference between the *par* of the tees they are playing and the tees with the lowest *par*.

These additional strokes are added to the player’s *Playing Handicap* as follows:

\[
\text{Playing Handicap} = (\text{Course Handicap} \times \text{handicap allowance}) + \text{difference in pars}
\]

**Notes:**

1. As an alternative, when the majority of the field are playing from the tees with the highest *par*, players competing from a set of tees with a lower *par* may be allocated fewer strokes for the round, equal to the difference between the *pars*.

2. For the avoidance of doubt, when there is no difference in *par*, no additional strokes are needed.

(ii) **Stroke Play and Match Play formats** (where results are recorded relative to *par*). As a player’s net (or gross) status versus *par* for the round is compared directly against that of every other player, no additional strokes are added to the standard calculation of the *Playing Handicap* when the *par* is different between tees.

This means that when two players are competing from different tees with a different *par*, the hole is considered halved or the score remains even if both players record a *par* on that hole. This is because the score on the hole is recorded relative to *par* rather than as the number of gross or net scores.

(iii) **Stableford formats.** As a player’s total number of Stableford points for the round is compared directly against that of every other player, no additional strokes are applied to the standard calculation of the *Playing Handicap* when the *par* is different between tees.

(iv) **Par/Bogey formats.** As a player’s Par/Bogey result for the round is compared directly against that of every other player, no additional strokes are applied to the standard calculation of the *Playing Handicap* when the *par* is different between tees.
IV

Administration of a Handicap Index

RULE 7
Committee Actions

Principle of the Rule:
The Handicap Committee plays a vital role in the successful administration of a player’s Handicap Index and is equipped with tools to intervene when the calculated Handicap Index is no longer reflective of the player’s demonstrated ability.

Used appropriately, these tools are designed to ensure that players are treated fairly and consistently from golf club to golf club.

The Committee in charge of the competition also plays an important role in setting appropriate Terms of the Competition for all participating players.

7.1 Handicap Committee

7.1a Conducting a Handicap Review and Adjusting a Handicap Index

(i) Conducting a Handicap Review. The Handicap Committee should conduct a review of a player’s Handicap Index using the process set out in Appendix D.

- The Handicap Committee has discretion to conduct a handicap review at any time. However, it is strongly recommended that the Handicap Committee conducts a review at least annually, for all members who have designated that golf club as their home club.
- A handicap review may also be conducted at the request of the player or another player at any time.
- Before making any adjustment to a player’s Handicap Index, the Handicap Committee should carefully consider all available evidence, including:
  - Whether the player’s scoring potential has been affected by a temporary or permanent injury, illness or disability which is significant enough to impact the player’s ability to play with or against all other players on a fair and equitable basis.
  - Any handicap(s) previously held by the player.
○ Whether the player’s ability is rapidly improving or declining.
○ Whether the player’s performance is significantly different in one format of play compared to another, for example between organized competitions and general play, unauthorized and authorized format of play.
○ Where it has been determined that a player’s actions are for the purpose of gaining an unfair advantage.

(ii) Adjusting a Handicap Index. In considering all of the available evidence, the Handicap Committee must decide the most appropriate course of action for any adjustment to a player’s Handicap Index, which can be either:

• Resetting the Handicap Index by applying an adjustment to each of the most recent 20 Score Differentials in the scoring record, to achieve the chosen Handicap Index that is determined to better reflect the player’s demonstrated ability.

○ This will allow for the Handicap Index to be updated as new scores are posted.
○ If fewer than 20 scores are recorded on a player’s scoring record the adjustment is applied to all recorded Score Differentials.
○ The Handicap Committee can remove the adjustment at any time if the adjustment is determined to no longer be warranted.

Or

• Freezing the Handicap Index at a level selected by the Handicap Committee for a defined period of time.

○ During this period, a player’s Handicap Index will not be updated as new scores are posted unless the Handicap Committee has determined to freeze only against upward movement.
○ The Handicap Committee can remove the freeze upon the Handicap Index at any time and the scores in the player’s scoring record will be used to calculate the player’s Handicap Index.

Any adjustment to a player’s Handicap Index resulting from a handicap review must:

• Be applied only after the player has been informed and has had an opportunity to respond to the Handicap Committee or, where appropriate, the Authorized Association. The player must have recourse to an appeals procedure, if requested.
Rule 7

- Be a minimum of 1 stroke, upward or downward.
- Only increase a player’s Handicap Index by up to 5.0 strokes above the player’s Low Handicap Index, unless there are exceptional circumstances. Such circumstances could include a player who has a long-term illness or injury preventing them from playing golf at the level previously attained.

Rule 7.1a Clarifications:

7.1a/1 – Resetting a Player’s Handicap Index by Adjusting the Most Recent 20 Score Differentials

Applying an adjustment to each of the most recent 20 Score Differentials in the player’s scoring record will ensure that the impact of the adjustment remains after the next score is submitted, gradually diluting the impact of the adjustment as more scores are submitted.

As an example, a player has a Handicap Index of 10.3 and the Handicap Committee decides to adjust this to 9.3 because recent scores suggest that the player is rapidly improving.

Using this example, the Handicap Committee would apply a -1 adjustment to each of the most recent 20 Score Differentials and the impact of this adjustment on the final calculation is illustrated in the tables below:

### Best 8

The Handicap Index calculation now averages the best 8 of the most recent 20 Score Differentials in the player’s scoring record incorporating the Committee applied handicap adjustment of -1 for each Score Differential, as follows:

\[
(10.2 + 10.8 + 7.1 + 9.3 + 7.1 + 10.1 + 9.3 + 10.2) \div 8 = \text{Handicap Index 9.3}
\]
7.1a/2 – Basis of Handicap Committee-Applied Adjustment For a Player Impacted by Illness or Injury

The Handicap Committee may consider adjusting a player’s Handicap Index if their ability has been impacted by a prolonged period of illness, injury or temporary disability. Such an adjustment can only be made after one or more acceptable scores have subsequently been submitted. In determining the level of any adjustment, the Handicap Committee should take into consideration the scores submitted compared to their previous Handicap Index and the nature and severity of the player’s condition.

After a number of scores have been submitted and it becomes evident that the player's condition has caused a permanent change to their ability, it may be appropriate to disregard the player’s scoring record and allocate a Handicap Index using only the scores submitted since the illness, injury or temporary disability occurred (see Rule 5.2a).

7.1b Posting a Missing Score or Penalty Score

(i) Reason for Not Submitting a Score

In a situation where a player fails to submit a score from an authorized format of play, the Handicap Committee has the authority to determine whether the player’s reason for not submitting the score was justified and take appropriate action.

Failure to submit a score for reasons the Handicap Committee may consider to be justified include, but are not limited to, unforeseen events such as sudden injury, illness or emergency, which adversely affected the ability of the player over the remaining holes after the event occurred.

Reasons which should not be considered justified include, but are not limited to:

- Forgetfulness
- Circumstances preventing the timely submission of score, for example access to Clubhouse or power cut.
- When one or more holes have not been played for a valid reason (see Rule 3.2).
- Preventing a low score from causing a Handicap Index to decrease.
- Preventing a high score from causing a Handicap Index to increase.
When the Handicap Committee determines that a player’s reason for failing to submit their score was justified, the score should not be posted for handicap purposes.

(ii) Score to be Posted

When the Handicap Committee determines that a player’s reason for failing to submit their score was not justified, they must act as follows:

- When the player’s actual score is discoverable:
  - Post the score, provided it meets all of the provisions set out within the Rules of Handicapping.
  - If the round was not completed for a valid reason and the score meets all of the other provisions set out in the Rules of Handicapping, post the score. The player’s expected score will be used for the hole or holes not played (see Rule 3.2).
  - If the Handicap Committee concludes that the player failed to submit the score for the purpose of gaining an unfair advantage (see Rule 1.3 (i)), it should consider applying an additional penalty score appropriate for the circumstances.

- If the player’s actual score is not immediately discoverable:
  - A penalty score should be applied.
  - If the player’s actual score is subsequently discovered, the actual score should be posted to the player’s scoring record. The Handicap Committee has discretion to leave the penalty score on the player’s scoring record or to remove it, depending on the circumstances.

The value of any penalty score applied to a player’s scoring record should be appropriate for the circumstances and/or the player’s intent. For example:

- If the player is determined to have acted for the purpose of lowering their Handicap Index, the penalty score should be equal to the highest Score Differential in their last 19 scores.

- If the player is determined to have acted for the purpose of raising their Handicap Index, the penalty score should be equal to the lowest Score Differential in their last 19 scores.

- If the player has not submitted a score for any other reason, and the score is not discoverable, the penalty score should be equal to their Course Handicap plus the Course Rating of the tees played, rounded to the nearest whole number.
For a player who repeatedly fails to submit acceptable scores, the Handicap Committee or the Authorized Association should consider either withdrawing their Handicap Index or taking other disciplinary action (for example, prohibiting the player from entering club competitions for a defined period of time).

(See Diagram 7.1b.)

### 7.1c Withdrawing a Handicap Index

The Handicap Committee, or Authorized Association, should withdraw the Handicap Index of a player who deliberately or repeatedly fails to comply with the player’s responsibilities under the Rules of Handicapping (see Appendix A).
The withdrawal of a player’s *Handicap Index* should be applied only after the player has been informed and has had an opportunity to respond to the *Handicap Committee, Authorized Association*, or other disciplinary panel.

A player must be notified of the length of time their *Handicap Index* will be withdrawn and any additional conditions.

### 7.1d Reinstating a Handicap Index

Reinstatement of a player’s *Handicap Index* will be required after a player’s *Handicap Index* has been withdrawn for a period of time.

To determine the level of *Handicap Index* at which the player is to be reinstated, the *Handicap Committee* may wish to consider:

- Reinstating the *Handicap Index* at a level that the *Handicap Committee* feels is currently reflective of the player’s demonstrated ability,
- Allocating a *Handicap Index* as if the player were new to the sport, or
- Reinstating the last recorded *Handicap Index*.

It is strongly recommended that, after a player’s *Handicap Index* has been reinstated, the *Handicap Committee* should monitor the player's *Handicap Index* closely over subsequent rounds and, where required, make appropriate adjustments.

### 7.2 Committee in Charge of a Competition

#### 7.2a Terms of the Competition

The Committee in charge of a competition may set entry/ eligibility requirements within the Terms of the Competition relevant to a player’s *Handicap Index* or calculated *Playing Handicap*. For example, the Committee can:

- Set a maximum *Handicap Index* for entry or use in the competition.
- Set a maximum *Playing Handicap*.
- Reserve the right to adjust the *Playing Handicap* of an entrant where there is evidence that the player’s *Handicap Index* does not reflect their demonstrated ability.
A Committee in charge of an elite level competition may also consider setting more detailed entry/eligibility criteria, for example:

- The requirement for the player to submit a copy of the most recent 20 scores in their *scoring record*, allowing the Committee to determine whether the player’s *Handicap Index* reflects their demonstrated ability. This could involve assessing the player’s performance in:
  - *general play* rounds;
  - competition rounds;
  - 9–hole rounds;
  - *general play* rounds compared to competition rounds;
  - 9–hole rounds compared to 18–hole rounds; and
  - the number of *acceptable scores* posted on a regular basis.

- The right to consider performance in unauthorized formats of play and/or

- Use of a player ranking, or some other indicator of ability based on performances in other competitions of equal stature.

For the purpose of updating a player’s *Handicap Index* after a competition where the Committee has set maximum limits, the player’s full, unrestricted *Course Handicap* should be used for the calculation of their *adjusted gross score*.

For ease of competition administration purposes, the Committee in charge of a multi–round competition played during the same or consecutive days must determine within the Terms of the Competition whether a player’s *Handicap Index* will remain unchanged for the duration of the competition. It is strongly recommended that the *Handicap Index* remains unchanged between such rounds.

### 7.2b Other Actions

The Committee in charge of a competition may reserve the right to determine that when course conditions are exceptionally poor, the submission of scores for handicap purposes should be suspended. The Committee should obtain approval from the appropriate *Authorized Association* when implementing such a suspension.
Appendix A: Rights and Responsibilities

The integrity of the World Handicap System relies on all key stakeholders ensuring that the requirements set down within the Rules of Handicapping are satisfied and that they carry out their respective responsibilities.

The key stakeholders within the Rules of Handicapping are:

- The player
- The golf club and its Handicap Committee
- Regional Golf Associations*  
- National Associations*
- Multi-National Associations*
- The USGA and The R&A  

* Collectively known as Authorized Associations

The responsibilities of each key stakeholder are:

1. **Player Responsibilities.** In order to comply with the requirements of the Rules of Handicapping, a player is expected to:

   (i) Act with integrity by following the Rules of Handicapping and to refrain from using, or circumventing, the Rules of Handicapping for the purpose of gaining an unfair advantage.

   (ii) Have only one Handicap Index from a single scoring record, which is managed by the player’s home club in accordance with the Rules of Handicapping.

   Note: This Handicap Index will apply elsewhere, including at all other golf clubs of which the player is a member.

   (iii) Ensure each golf club of which they are a member knows the details of:

       - All other golf clubs that they are a member of, and
       - Which golf club that they have designated to be their home club.
(iv) Ensure that, prior to playing a round in an authorized format of play, they:
   • Know their current Handicap Index,
   • Inform the Handicap Committee or the Committee in charge of the competition of any discrepancies with their Handicap Index and provide details of any outstanding scores yet to be submitted or posted to their scoring record, and
   • Know the holes where handicap strokes are to be given or received.
(v) Attempt to make the best score possible at each hole.
(vi) Where applicable, ensure all acceptable scores are submitted for handicap purposes in order to provide reasonable evidence of their demonstrated ability. This includes scores from outside the player’s home jurisdiction. Acceptable scores should be submitted:
   • As soon as possible after the round is completed and before midnight on the day of play (local time), and
   • In the correct chronological order.
(vii) Provide any new golf club with the full details of their previous playing history, Handicap Index held, memberships and any other information relevant to their golfing ability.
(viii) Play by the Rules of Golf.
(ix) Certify the scores of other players.
Appendix A

2. **Golf Club/Handicap Committee, Regional Associations, National Associations and Multi-National Association Responsibilities.** In order to comply with the requirements of the *Rules of Handicapping*, *Handicap Committees* and *Authorized Associations* are expected to:

</table>
Notes: Many data fields may be automated by the handicap computation service.

1. The *home club* (recognized for handicap management purposes) can be automatically populated from the player’s identification number or name.

2. The current *Handicap Index* can be automatically populated from the last calculated *Handicap Index*.

3. Date Submitted – can default to the current day the score is being submitted and posted into the *scoring record*, with a choice to change where appropriate.

4. The course database (held either locally or centrally) may provide automatic entries for: State/Country; *Course Rating*; *Slope Rating*; par and *Course Rating minus par* calculations.

5. **If required, score type designation(s) should be determined by the Authorized Association** and can be used to help identify the format of play, where a round was played and other details about the round. This is primarily to assist with the *Handicap Committee* review process but can also ensure that the *Rules of Handicapping* are applied correctly.

Examples of how scores might be designated include:

Type of Play: **Competition**; *General play*; 9–hole round *(N)*

Format of Play: **Stroke play**; *Match play*

Where round was played: *Home*; *Away*

When hole not played: Not Played *(X)*

Other details: *Incomplete round*; *Exceptional score*; *Penalty score*

6. ***Where hole–by–hole score entry is in use, applicable adjustments to the gross score can be automatically applied. If hole–by–hole scoring is not in use, the adjusted gross score will need to be calculated and recorded manually.***

7. The *Course Handicap* can be automatically calculated using the player’s *Handicap Index*, the *Course Rating*, the *Slope Rating* and the *par* of the tees played.

8. *Adjusted gross score(s) can be calculated automatically.*
9. **Stableford Points** and Par/Bogey results can be calculated automatically where hole-by-hole score entry is in use; otherwise they will need to be manually entered as total points/result.

10. Any selected end-of-process adjustments, such as exceptional scores and/or adjustments applied by the Handicap Committee, can be automatically applied to calculate the final adjusted Handicap Index.

Where fields cannot be populated automatically, they need to be populated manually when entering scores into the system.
Appendix C: Handicap Allowances

Handicap allowances are designed to provide equity in different formats of play, over both 9 holes and 18 holes.

Handicap allowances are applied to the unrounded Course Handicap as the final step in calculating a player’s Playing Handicap (see Rule 6.1 and Rule 6.2).

The National Association is responsible for establishing handicap allowances, or it can delegate this responsibility to a Regional Golf Association or golf club.

The following table sets out the recommended handicap allowances which, for medium-sized field, individual stroke-play net events, are designed to give all players a similar chance of finishing in the top 10% when playing well. For match play and team formats, the recommended handicap allowances are designed to give each player or team the same chance of winning.

</tr>
</tbody>
</table>

Allowances may be adjusted for different field sizes and/or the make-up of the field (see Clarification C/1).

**Handicap Competitions:**

For organized competitions, the Committee should specify the *handicap allowance* within the Terms of the Competition.
In general, after *handicap allowances* have been applied in stroke-play formats, a player receives their full *Playing Handicap*.

In general, after *handicap allowances* have been applied in match-play formats, the player with the lowest *Playing Handicap* plays off zero strokes relative to the other player(s). The other player(s) receive(s) the difference between their own *Playing Handicap* and that of the player with the lowest *Playing Handicap*.

**Plus Playing Handicaps:**

Unless otherwise specified by the Committee, players with a ‘plus’ *Playing Handicap* give strokes back to the course, beginning at the hole with *stroke index* 18. For example, a player with a *Playing Handicap* of +2 would give strokes back to the course at the holes with *stroke index* 18 and 17.

When *handicap allowances* are applied, a player with a plus *Playing Handicap* moves up towards zero including rounding. This is to maintain the same relative difference between *Playing Handicaps*.

**Extra Holes:**

*Handicap allowances* are designed to create equity over 9 or 18 holes. The Terms of the Competition should specify where handicap strokes should be applied if extra holes are required to determine the winner or other finishing positions (see Official Guide to the *Rules of Golf*, Committee Procedures Section 5A(6)).
APPENDIX C Clarifications:

C/1 – Impact of Field on Recommended Handicap Allowance

Field sizes and the make-up of the field have an impact on equity and may be taken into consideration when determining handicap allowances for a specific event, especially in individual stroke-play formats.

The recommended handicap allowance for all individual stroke-play formats is set at 95% for medium-sized field net events, which is a field of between 30 and 100 players. However, for a field size of fewer than 30 players, a handicap allowance of 100% could be considered. Likewise, if there is a significant percentage of higher handicap players in the field, a lower allowance could be considered (for example, 90% instead of 95%).

The following table indicates how the recommended handicap allowances in individual stroke-play formats could be modified based on the size and make-up of the field:

### Recommended Handicap Allowances relative to 95%

<table>
<thead>
<tr>
<th>Field Size</th>
<th>More lower handicap players</th>
<th>Normal distribution</th>
<th>More higher handicap players</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small (&lt;30 players)</td>
<td>Higher</td>
<td>Higher</td>
<td>Same</td>
</tr>
<tr>
<td>Medium (30–100 players)</td>
<td>Higher</td>
<td>Same</td>
<td>Lower</td>
</tr>
<tr>
<td>Large (&gt;100 players)</td>
<td>Same</td>
<td>Same</td>
<td>Lower</td>
</tr>
</tbody>
</table>

As an alternative, Committees may consider adapting their competitions to include divisions or flights, with different handicap ranges competing for different prizes.
### Example 1:
In singles individual stroke-play events, the 95% handicap allowance is applied to each player’s Course Handicap, which means player A receives 10 strokes, player B receives 17 strokes, player C receives 26 strokes and player D receives 37 strokes.

### Example 2:
In singles match play between player A and player B, where the handicap allowance is 100%, player A plays off zero (0) strokes and player B receives 8 strokes in the match.

### Example 3:
In Four-Ball match play, player A would play off zero (0) strokes, player B would receive 7 strokes (90% of the difference in Course Handicap from player A), player C would receive 15 strokes (90% of 17) and player D would receive 26 strokes (90% of 29).

### Example 4:
In Foursomes match play where players A and B are Team 1 and players C and D are Team 2, Team 2 would receive 19 strokes (50% of the difference between each Team’s combined Course Handicaps).

### Notes:
1. The strokes received in Four-Ball match play remain the same even if the lowest handicap player is unable to play.
2. For ease of illustration, the handicap allowance has been applied to the rounded Course Handicap in the above examples.
C/3 – Examples of How to Allocate Strokes in Handicap Competitions Involving Plus Handicap Players and When Handicap Allowances Apply

The following illustration indicates how an 85% handicap allowance is applied to two teams playing in a Four-Ball stroke-play competition with Course Handicaps of +4 (player A), 16 (player B), 7 (player C) and 26 (player D):

The 85% handicap allowance results in a 17-stroke difference between partners for Team 1 and a 16-stroke difference between partners for Team 2. This is approximately 85% of the difference between the Course Handicaps, and maintains relative equity.

When applying a handicap allowance, any reduction will always result in a Playing Handicap closer to zero, including for players with a plus Handicap Index.
Examples:

<table>
<thead>
<tr>
<th>Player</th>
<th>Course Handicap</th>
<th>Four-Ball Stroke Play</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>Playing Handicap</td>
</tr>
<tr>
<td></td>
<td></td>
<td>85% Handicap Allowance</td>
</tr>
<tr>
<td>A</td>
<td>+4</td>
<td>+3</td>
</tr>
<tr>
<td>B</td>
<td>16</td>
<td>14</td>
</tr>
<tr>
<td>C</td>
<td>7</td>
<td>6</td>
</tr>
<tr>
<td>D</td>
<td>26</td>
<td>22</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Four-Ball Match Play</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>90% Handicap Allowance</td>
</tr>
<tr>
<td>A</td>
</tr>
<tr>
<td>B</td>
</tr>
<tr>
<td>C</td>
</tr>
<tr>
<td>D</td>
</tr>
</tbody>
</table>

1: In Four-Ball stroke play with a handicap allowance of 85%, player A gives 3 strokes back to the course, player B receives 14 strokes, player C receives 6 strokes and player D receives 22 strokes.

2: In Four-Ball match play, player A plays off zero (0) strokes, player B receives 18 strokes (90% of the difference in Course Handicaps from Player A), player C receives 10 strokes (90% of 11) and player D receives 27 strokes (90% of 30).

3: In Foursomes match play where players A and B are Team 1 and players C and D are Team 2, Team 2 would receive 11 strokes (50% of the difference between the aggregate of each Team’s Course Handicaps).
Appendix D: Handicap Review

The *handicap review* process gives a *Handicap Committee* the ability to ensure the *Handicap Index* of a player reflects their demonstrated ability.

To assist this process, the World Handicap System software specifications set out a range of recommended reports, analyses and notifications which can be developed within the handicapping software used by *Handicap Committees* to administer members’ handicaps.

These tools will:

- Identify players who are consistently scoring above, or below, their ‘expected’ scoring range or where other abnormalities within a player’s *scoring record* exist, and
- Make a recommended adjustment to the *Handicap Index* of each player identified, up to a maximum of 2 strokes.

A recommended adjustment will be applied only at the discretion of the *Handicap Committee*, based on any other knowledge or evidence that they have about the player and their demonstrated ability.

The *handicap review* reporting tools compare a player’s *Handicap Index*, individual scores and scoring patterns against expectations using the following:

- The player’s *expected score* in their next round,
- The expected standard deviation of the player’s *Score Differentials*,
- The player’s expected scoring range.

The number of abnormal scores in the player’s *scoring record* as a percentage of the total number will also be taken into account. The larger the number of scores in a player’s *scoring record*, the more scores above or below their expected scoring range are required for the player to be flagged for a *handicap review*.

Other information that may also be considered during the *handicap review* process include:

- The player’s current *Low Handicap Index*.
- Length of time since a player last played to their *Handicap Index*.
- Number of scores since a player last played to their *Handicap Index*. 
• Number of times and the percentage of the Score Differentials posted during the review period when a player has played to their Handicap Index, or better.

• The number of Exceptional Score adjustments applied during the review period.

• The number of Handicap Index calculations in which the Soft Cap or Hard Cap were applied, during the review period.

• The frequency of a player’s score submissions over the last 12–month cycle, or selected period of time, compared to the previous 12–month cycle, or comparative period(s).

• The trend of a player’s Handicap Index, such as differences in the level of consistency of the player’s Handicap Index over the past 12–24 months.

• Comparison of a player’s average Score Differentials across all chosen authorized formats of play, the score types of which should be clearly identifiable and appropriately annotated (see Appendix B). For example, competition versus general play, stroke play versus match play, individual versus team formats etc.

• A player’s indicative potential indicated by the best 40% of the player’s Score Differentials during the review period.

• Any consecutive sequences of Score Differentials significantly above or below the expected Score Differential distribution for the player’s Handicap Index.

• Any scores from, or performances known in, non–authorized formats of play.

• Any other knowledge that the Handicap Committee has relative to the player’s golfing ability. For example, improving play following golf lessons, declining scoring potential due to frequency of playing, ageing, incapacitating injuries or illness, etc.

• Percentage of acceptable scores submitted at a player’s home club.

• Percentage of acceptable scores submitted from general play formats.

• Percentage of acceptable scores from 9–hole rounds.

• Identifying relevant handicapping trends for Handicap Committee consideration.

• Information supplied by any other golf club where the player is a member.
Notes:

1. If a Handicap Committee considers that more than a 2–stroke adjustment to a player’s Handicap Index is required, this should only be made under exceptional circumstances. For example, for a player who has an illness, injury or temporary disability impacting their ability to play with or against all other players on a fair and equitable basis (see Rule 7.1a).

2. The handicap review procedure may be used to determine an adjustment of greater than 2 strokes by continuing to run the iterative process.

3. When applying any adjustment to a player’s Handicap Index, it is important that the Committee also considers resetting their Low Handicap Index, to allow for future upward movement of their Handicap Index.
Appendix E: Stroke Index Allocation

The Rules of Golf state: “The Committee is responsible for publishing on the scorecard or somewhere else that is visible (for example, near the first tee) the order of holes at which handicap strokes are to be given or received.” (See Rules of Golf, Committee Procedures, Rule 5J (4).)

It is recommended that a stroke index allocation be applied over 18 holes, split into six triads with each hole ranked on its playing difficulty relative to par. Authorized Associations can provide a report detailing the difficulty factor that has been assigned to each hole derived from the Course Rating System.

The recommended methodology and procedures for determining a stroke index allocation within the six triad structure, designed to accommodate both stroke-play and match-play formats, is as follows:

- Apply odd stroke index allocations over the front nine and even stroke index allocations over the back nine. If, however, the back nine is significantly more difficult than the front nine, as determined by the Course Rating, the even stroke index allocations can be switched to the front nine and the odd stroke index allocations to the back nine.
- Spread stroke index allocations evenly over the 18 holes so that players receiving strokes will have the opportunity to use a high proportion of these strokes before a match result has been decided.
- Apply the lowest stroke index hole (1 or 2) on each nine in the middle triad. If no hole within the middle triad is ranked within the lowest 6 holes relative to par, then it can be moved into an adjacent hole at the end of the first triad or the beginning of the third triad on each nine.
- Apply the second lowest stroke index hole (3 or 4) on each nine in either the first or third triad, unless the lowest stroke index hole has been allocated in that same triad.
- If possible, avoid low stroke indexes (6 or less) on consecutive holes.
- When a player receives more than 18 strokes, the same allocation order is used with stroke index 1 repeating as stroke index 19, 37 and 55, with all additional strokes going up sequentially.

These recommended procedures support the guidance contained in the Rules of Golf, Committee Procedures, Rule 5J (4).
Stroke Index Allocation for 9-Hole Play

The strokes received in a 9-hole format of play on an 18-hole *golf course* should be taken in ascending order from the published *stroke index* allocation for 18 holes. Alternatively, the *Handicap Committee* may consider amending the *stroke index* allocation from 1 to 9, relative to the ascending order of the published *stroke index* allocation for 18 holes.

For plus handicap players, where they are required to give strokes back to the course, this should commence on the hole with the highest published *stroke index* allocated for the 9 holes or, if the *Handicap Committee* has amended the *stroke index* allocation from 1 to 9, at the hole with *stroke index* 9.

Sample *Stroke Index* Allocations

| Hole | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 |
|------|---|---|---|---|---|---|---|---|---|----|----|----|----|----|----|----|----|
| Stroke Index | 7 | 15 | 5 | 11 | 1 | 13 | 3 | 17 | 9 | 8 | 16 | 6 | 12 | 2 | 14 | 4 | 18 | 10 |

When a Committee decides to amend an 18-hole *stroke index* allocation to create a 9-hole equivalent:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
Appendix F: Establishing Par

The *Rules of Handicapping* feature par as a factor in the calculation of:

- *Course Handicap*,
- *Net double bogey*, and
- *Net par*.

It is important that an accurate *par* be established for each hole on a *golf course* for both men and women, and these values should be printed alongside each hole on the scorecard.

It is recommended that *par* be established for each hole in accordance with the following hole lengths:

<table>
<thead>
<tr>
<th>Par</th>
<th>Men</th>
<th>Women</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>Up to 260 yards</td>

</tbody>
</table>

Note: These guidelines assume an altitude less than 2,000 feet/610 metres above sea level.

As *par* reflects the score a *scratch player* is expected to score on a given hole, it may also be appropriate to take into consideration the following information when allocating *par*:

- The playing difficulty of the hole, including any effective length correction factors, such as elevation changes, forced lay-ups, and prevalent wind.
- Where a hole length falls within two *par* ranges, for example 470 yards (men) or 400 yards (women), the *par* may be allocated as 4 or 5 depending on the difficulty of the hole.
- The way the hole is designed to be played.
Where appropriate, the standardization of par across tee sets is recommended. For example, if the hole lengths from all sets of tees on a specific hole lie within the recommended par 5 range for men, with the exception of the forward tee at 410 yards, the forward tee should also be designated as a par 5 hole if it can be determined that it was designed to be played as a par 5 for the majority of players who will choose to play the hole from that tee. Additional consideration may also be given to the set of tees most commonly played by men and women and the most common par, for men and women, across all sets of tees on a hole.

The standardization of par helps to simplify:

- The calculation of the number of strokes given or received when players are competing from multiple sets of tees.
- The consistent application of net double bogey and net par to determine a player’s adjusted gross score across all tee sets on a hole.
Appendix G: The Golf Course, Course Rating and Slope Rating

Course Measurement, Course Rating and Slope Rating, and Modification of Courses

a. General

An Authorized Association is responsible for determining and issuing Course Ratings and Slope Ratings for the golf courses within its jurisdiction (see Definition of golf course). A Course Rating and Slope Rating can be issued to golf courses with a minimum length of 750 yards (685 metres) for 9 holes and 1500 yards (1370 metres) for 18 holes.

Course Ratings must be reviewed periodically and revised and reissued as necessary. New golf courses can change frequently during the first years after construction and must be re-rated within five years of the initial rating date. Thereafter, golf courses must be re-rated at least once every 10 years.

b. Course Measurement

Each hole must be measured to the nearest yard/metre, for each set of tees from a permanent distance marker, in accordance with the procedures outlined in the Course Rating System and only by a qualified person or organization. Authorized Associations can provide a copy of the measurement procedures to those involved in the measurement process.

c. Tee Markers

The tee markers used to designate each set of tees on a golf course should be consistent in name, colour and/or design and distinguishable from the tee markers used for other sets of tees. It is strongly recommended that the Authorized Association issues guidance to golf clubs as to how these avoid any association with gender or age.

d. Display of Ratings and Par

The Course Rating, Slope Rating and par for each set of tees must be readily available so that it is easy for a player to convert their Handicap Index to a Course Handicap and Playing Handicap to submit an acceptable score.
e. Course Rating and Slope Rating

The Course Rating and Slope Rating is the evaluation of the playing difficulty of the course for the scratch player and the bogey player under normal playing conditions. The effective playing length is determined from the measurement of each hole, adjusted for the impact of roll, wind, elevation changes, altitude, dog-legs and forced lay ups. In addition to the effective playing length, there are 10 obstacle factors evaluated on each hole for both the scratch player and the bogey player. These are: topography; fairway; green target; recoverability and rough; bunkers; crossing obstacles; lateral obstacles; trees; green surface and psychology. The Course Rating System uses table values, adjustments and formulas to calculate ratings.

The Course Rating is calculated from the effective playing length and obstacle factors for 9 or 18 designated holes. The Course Rating is expressed in strokes to one decimal point and represents the expected score for a scratch player. The Bogey Rating represents the expected score for a bogey player. The difference between the Course Rating and the Bogey Rating is used in the determination of the Slope Rating. A golf course of standard relative difficulty has a Slope Rating of 113.

The front of a teeing area, as defined in the Rules of Golf, should not be placed more than 10 yards (10 metres) in front of, or behind, the relevant permanent distance marker on each hole. Over an 18–hole round, a golf course should not be shortened (or lengthened) by more than 100 yards (100 metres) from its measured length, to ensure accurate application of the Course Rating and Slope Rating in the calculation of players’ Score Differentials. The equivalent value for a 9–hole round is 50 yards (50 metres).

f. Modification of Courses

(i) Temporary Changes

The Handicap Committee must notify the Authorized Association when temporary changes are being made to the golf course that may affect the Course Rating. The Authorized Association will determine whether scores made under such conditions are acceptable for handicap purposes, and whether the Course Rating and Slope Rating should be modified temporarily.

Where a temporary Course Rating and Slope Rating has been issued, this information must be made available to players prior to the commencement of their round.
Appendix G

For an 18-hole golf course:

If approved by the Authorized Association, the issuance of a temporary Course Rating and Slope Rating is determined by the Handicap Committee and/or the Authorized Association following the procedure set out below:

- Locate the nearest set of rated tees for the appropriate gender.
- Determine the measured difference between the set of tees being played and the rated set of tees.
- For differences under 100 yards (100 metres), no adjustment is necessary and scores can be submitted as usual; otherwise
- For differences between 100 and 300 yards (100 and 274 metres), the below table can be used to determine the adjustments required and issue a temporary Course Rating and Slope Rating.
Using these guidelines and the table below, find the range that includes the yardage difference:

<table>
<thead>
<tr>
<th>Men's Rating Adjustment</th>
<th>Women's Rating Adjustment</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Yards [Metres]</strong></td>
<td><strong>Course Rating</strong></td>
</tr>
<tr>
<td>100 to 120 [100 to 110]</td>
<td>0.5</td>
</tr>
<tr>
<td>121 to 142 [111 to 130]</td>
<td>0.6</td>
</tr>
<tr>
<td>143 to 164 [131 to 150]</td>
<td>0.7</td>
</tr>
<tr>
<td>165 to 186 [151 to 170]</td>
<td>0.8</td>
</tr>
<tr>
<td>187 to 208 [171 to 190]</td>
<td>0.9</td>
</tr>
<tr>
<td>209 to 230 [191 to 210]</td>
<td>1.0</td>
</tr>
<tr>
<td>231 to 252 [211 to 230]</td>
<td>1.1</td>
</tr>
<tr>
<td>253 to 274 [231 to 250]</td>
<td>1.2</td>
</tr>
<tr>
<td>275 to 300 [251 to 274]</td>
<td>1.3</td>
</tr>
<tr>
<td><em>Please contact your Authorized Association for any adjustment greater than 300 yards (274 metres)</em></td>
<td></td>
</tr>
<tr>
<td>261 to 278 [239 to 254]</td>
<td>1.5</td>

<tr>
<td>279 to 300 [255 to 274]</td>
<td>1.6</td>
</tr>
<tr>
<td><em>Please contact your Authorized Association for any adjustment greater than 300 yards (274 metres)</em></td>
<td></td>
</tr>
</tbody>
</table>
Notes:

- An adjustment must not be applied that would result in a yardage shorter than the minimum length of 750 yards (685 metres) for 9 holes and 1500 yards (1370 metres) for 18 holes.
- These guidelines assume an altitude less than 2,000 feet/610 metres above sea level.
- If the unrated tees are longer than the rated tees, add the resulting table values to the ratings of the nearest set of tees rated for the appropriate gender.
- If the unrated tees are shorter than the rated tees, subtract the resulting values from the ratings of the nearest set of tees rated for the appropriate gender.
- For differences above 300 yards (274 metres), play for the day would be ineligible for handicap purposes, unless otherwise determined by the Authorized Association in advance of the round or competition.

For a 9-hole golf course:

If approved by the Authorized Association, the issuance of a temporary Course Rating and Slope Rating is determined by the Handicap Committee and/or Authorized Association following the procedure set out below:

- Locate the nearest set of rated tees for the appropriate gender.
- Determine the measured difference between the set of tees being played and the rated set of tees.
- For differences under 50 yards (50 metres), no adjustment is necessary and scores can be returned or posted as usual; otherwise
- For differences between 50 and 150 yards (50 and 137 metres), the table below can be used to determine the adjustment and issue a temporary Course Rating and Slope Rating.
Using these guidelines and the table below, find the range that includes the yardage difference:

<table>
<thead>

<td>117 to 134 [107 to 122]</td>
<td>0.7</td>
<td>3</td>
</tr>
<tr>
<td>*Please contact your Authorized Association for any adjustment greater than 150 yards (137 metres)</td>
<td></td>
<td></td>
<td>135 to 150 [123 to 137]</td>
<td>0.8</td>
<td>3</td>
</tr>
</tbody>
</table>

*Please contact your Authorized Association for any adjustment greater than 150 yards (137 metres)

Note: If playing a combination of different sets of tees, a current Course Rating and Slope Rating must be available to submit an acceptable score. If the Committee in charge of a competition has used a combination of tees for a competition course, this temporary rating procedure may be used, but this procedure is not a substitute for a formal or permanent Course Rating and Slope Rating.

(ii) **Permanent Changes**

A golf club must notify the Authorized Association when permanent changes are made to a golf course. Permanent changes to the golf course require the Authorized Association to review the current Course Rating and Slope Rating and to determine whether a re-rating is necessary.
Local Guidance for Golf Club Committees
USGA Handicap Committee Guide

The USGA Handicap Committee Guide is available in digital format only and is designed as a complement to the Rules of Handicapping book. The guide is meant to assist the Handicap Committee at a Golf Club in the practical application of the Rules of Handicapping, and provide guidance on how to carry out its responsibilities to ensure all players have an opportunity to play or compete on a fair and equitable basis with fellow players. In it you will find information and examples specific to a Handicap Committee and its responsibilities within the United States and its territories.

A Golf Club is an organization of individual members that operates under bylaws with Committees (Handicap Committee required) to supervise golf activities and maintain the integrity of the Rules of Handicapping. Only a player affiliated with an authorized Golf Club can establish or maintain a Handicap Index.

The club must be affiliated with and authorized by the Allied Golf Association (AGA) in its area. The AGA is the body under which a Golf Club sits and should be consulted as needed for support.

Please find the USGA Handicap Committee Guide at www.usga.org/rulesofhandicapping

Please Note: This Committee Guide will be revised periodically to align with various initiatives or where changes to local guidance is necessary in between revisions to the Rules of Handicapping.
