NOTICE TO MANUFACTURERS

This is in reference to the notice of August 1990, in which you were advised of a Proposed Rules Change which would specify that the grip shall be continuous. If adopted, this would prohibit two or more grips on any club. Comment on the proposed change was requested.

Based on input received, an alternative proposal is also being considered. This alternative proposal would provide that if a club featured two grips (sections of added material) the club would conform if the grips are circular in cross-section and their axes coincided with the axis of the shaft.

This alternative proposal will be considered at the next joint USGA/R&A rules meeting in late April.

If you have any comments regarding the above, please address these to the undersigned.

Frank W. Thomas
Technical Director
