

INFORMATION TECHNOLOGY

The USGA has an Information Technology Department (IT) that will manage all the requirements for the USGA. In the spring of the year of the championship, Robbie Zalzneck will facilitate a call between the Host Club and the designated USGA IT staff person to discuss the USGA requirements and determine the best method for meeting those needs.

While each U.S. Amateur may have unique USGA requirements, the basic services in need are listed below:

PROPOSED HIGH SPEED LOCATIONS AND REQUIREMENTS

I. MEDIA CENTER

i. USGA Media Center - USGA Staff

- Recommended one dedicated high-speed line (50/10 Mbps) for data
- Wired or wireless

ii. Public Media Work Area

- Minimum of one dedicated high-speed line (50/10 Mbps)
