

MATCH-PLAY TRANSPORTATION

Once match-play begins on Wednesday, transportation should be available for players if their match ends on the course (outside of walking distance to the clubhouse). This service is very busy on Wednesday afternoon for Round 1 and all day on Thursday for Rounds 2 and 3.

The USGA and the Host Club should mutually determine the best plan to provide for this transportation. Cart shuttles are the normal mode of transportation and if so chosen, multi-passenger carts are the most efficient.

There are two basic ways to handle this transportation:

1. Identify specific points on the golf course as pick up locations and run continuous shuttles from those points to the clubhouse.
2. Have a group of carts (aka Vulture Carts) that will be dispatched to follow matches as they near completion and transport those players directly from the green where the match ends.

The USGA Rules Officials will notify Robbie Zalzneck and/or Chris Mills of the USGA who will stay in constant communication with the committee on a daily basis to manage this transportation.
