

Tee Times Sheet

"Tee Times" is the official terminology used by the USGA. Please use this wording in lieu of "Pairing Sheets".

It is the Host Club's responsibility to produce complimentary daily groupings and starting time sheets to be given to the players, officials, club members, media and spectators. The tee time sheet should contain the following:

- A front cover will be designed by the USGA and artwork will be provided to the Host Club.
- A course map that would show the course layout and the main spectator facilities. A sample of the map is below:
- This is NOT an evacuation map.

- The hole/par/yardage chart.
- The groupings or match-play tree provided by the USGA (see below for sample).
- Advertising may be included on the groupings and starting time sheet subject to USGA rules and regulations.

Most tee time sheets are produced as 11"x17" in full size and folded 3-4 times to final distribution size.

The suggested shell paper type should be a "flat uncoated" finish.

A local printer should be located to produce the tee time sheets or if a capable person on sight is able to produce, this is also acceptable.

The Host Club should develop one shell (one side of the full slick) that will include the front cover, the course map and any approved advertising. The reverse side will be held for the stroke play groupings or match-play tree provided by the USGA. The final shell design should be sent to the USGA for approval. Once approved, the shell can be printed in full prior to the championship or on a daily basis.

Stroke Play Tee Times Slick

The USGA will design the slick for the groupings for the stroke play rounds. Registration Committee will confirm player hometowns, etc and this information will be given to the USGA scoring staff who will confirm the player names, hometowns and starting times for stroke play and finalize the design of this slick.

Once completed, they will create a PDF of the stroke play information and send to the Host Club's printer. This will take place Friday once all players have registered. The same information will be used for tee time sheets on Saturday and Sunday. We do not update the tee time sheet after round 1 scores.

Sample of a one-page Stroke Play Tee Time slick.

During stroke play, tee time sheets should be distributed at both the Host Club and Co-Host (if applicable). A simple course map of the Co-Host showing the course layout and spectator facilities can be printed on a one page sheet and inserted into the tee time sheet.

Match Play Tee Times Slick

Once Stroke Play is complete, the USGA scoring staff will create the match-play tree for Monday's groupings and starting time sheet in PDF form and send to the Host Club's printer or if a capable person on sight is able to produce, this is also acceptable. If there is a playoff for the final match-play spots that has not been completed, we will use "TBD" for those player slots.

The USGA scoring staff will continue each evening through the conclusion of the championship to update the match-play tree and either send to the printer or print onsite.

A sample of the match-play slick is below:

Printing numbers will vary based on spectator attendance. Assuming a 1,000 weekly attendance number, suggested print numbers would be:

- 600 for Saturday-Sunday, Stroke Play Rounds (combined and including Co-Host)
- 150 for Monday, Round of 64
- 150 for Tuesday, Rounds of 32 & 16
- 100 for Wednesday, Quarterfinals and Semi-Finals
- 100 for Thursday, Final of Match-Play
- 150 for Monday, Round of 32
- 150 for Tuesday, Rounds of 16 & Quarterfinals
- 100 for Wednesday, Semifinals & Finals
